

Company profile

We make the world of
information more organized

We have 32 years of experience in development
and integration of information systems in more
than 20 countries on 5 continents.

We have been focusing on development and implementation of information systems for military logistics since the early 1990's. Our software makes life easier for hundreds of thousands of people from defence departments, military industry, public administration and judicial officers and lawyers.

A secure and trusted partner for your new information system

Our aim is to build lasting relationships with our customers and provide them with fully comprehensive care. We offer support throughout the whole life cycle of our IS as well as a wide range of services and other related products.

During its existence, AURA has established a highly qualified and stable team of experienced analysts, programmers, testers, configuration engineers, managers, lecturers, technicians and project managers with highly efficient functioning infrastructure.

For the future, we look to maintain our position as a leading market player for information systems for military logistics and to spread our capabilities and know-how into new fields of civil legal agenda and law practice.

“We don’t make contracts, we build partnerships.”

Filip Engelsmann
General Director

International mission

Since 2012, AURA has been supporting the NCS College, international NATO Codification System courses organized by the University of Defence in Brno and National Codification Bureau of the Czech Republic.

We are actively involved in the AC/135 Transformation Steering Working Group looking at the modernisation of the NATO Codification System.

Quality and security

Quality is a fundamental requirement in our company. AURA has been certified by the National Security Authority of the Czech Republic for access information classified up to the security level “Confidential”.

Our certifications:

- ISO 9001
- NATO AQAP 2110
- ISO/IEC 27001
