LMC-01.GC

LMC-02.GC

LMC-01.BC

Gigabit/Fast Ethernet
Mini Media Converter
Ruggedized type

LMC-01.GC

LMC-02.GC

The LMC Mini series introduces the mini media converter housed in a robust metal box. It provides Expanded Beam connectors for fiber optic cable and copper twisted pairs ports for harsh environmental conditions. The LMC rugged design extends the use of Ethernet in military, aerospace, broadcasting, petrochemical and harsh industrial applications. It meets the demands for mobility, easy installation and the mechanical resistance necessary for tactical deployment in the field. The LMC converters give the freedom to extend 10/100/1000 Mbps cabling distance by allowing connectivity up to 2 km over MM fiber, up to 50 kilometers if using SM fiber. LED indicators show the power status of the converter, LAN port and fiber activity.

The basic LMC-01/02.GC configuration includes the media converter in a ruggedized box. The optical and electrical ports converters are terminated at separate connectors: HMA type for FO, rugged RJ-45 for copper LAN interface. Power supply is ensured via a 3-pins rugged connector.

LMC configuration

- LMC-01.BC Fast Ethernet Media Converter
- LMC-01.GC Gigabit Ethernet Media Converter
- LMC-02.GC 2x Gigabit Ethernet Media Converter

Key Features

- Rugged design for use in harsh environments
- Small compact box
- 10/100/1000BASE-TX to 1000BASE-X converter
- HMA Expanded Beam FO interface
- Auto-Cross over for MDI/MDIX in TP port
- Auto-Negotiation or Manual mode in TP port
- Store and forward mode1
- Support Jumbo Frame 9K Packet (LMC-01.GC, LMC-02.GC)
- Support Link Fault Pass Through (LFP) Function (LMC-01.-GC, LMC-02.GC)

Product Specifications

LMSW-83M

**Ruggedized PoE Gigabit Ethernet
Ruggedized Gigabit Ethernet
Layer 2 Managed PoE Switch
3x 100/1000Base-X FO HMA
8x 10/100/1000Base-T, RJ-45 with PoE+**

LMSW-83M

The LMSW-83M is Layer 2 military grade managed switch with 3x Fiber optic HMA-J ports (Gigabit or Fast Ethernet) and 8x 10/100/1000Base-X RJ-45 ports with PoE+ functionality that provides stable and reliable Ethernet transmission. The LMSW-M series models can provide excellent data optical network performance and feature a rugged design. The switch supports a variety of management functions, including STP/RSTP/MSTP and ITU-T G.8032 Ring<50 ms recovery time, advanced PoE management functions such as PoE device auto-checking and auto reset, layer 2 Ethernet IGMP, VLAN, QoS, Security, IPv6, bandwidth control, port mirroring, cable diagnostic and Green Ethernet. The switch is able to fit all the common 12/24 V DC and 230 V AC power systems simultaneously (redundant power supply). The switch operates in a wide operating temperature range -40 to +70°C. The switch can operate as a stand alone device or in addition, the 19" brackets allow switch installation into a 19" rack.

Key features

- Robust compact design resistant to harsh environmental conditions and rough handling
- Front panel : 8x 10/100/1000Base-T
- RJ-45 interface with support of IEEE802.3af/at PoE output (30 W per Port, up to 180 W)
- Rear panel: 3x 100/1000Base-X FO port with HMA-J connectors
- Built-in power booster design up to 55 V DC for PoE/PoE+ output
- Redundant dual input AC/DC power supply available

LMSW-E33-82P-S310/MRJ

The OPTOKON® LMSW-E33 ruggedized switch based on Cisco® Embedded Service Switch (ESS) 3300 extends switching capabilities to mobile and embedded networks that operate in extreme environments. The flexible, compact form factor of the switch, powered by Cisco IOS® Software, provides highly secure data, voice, and video communications to stationary and mobile network nodes, making it ideal for use in harsh environmental conditions. 10G fiber optic ports are terminated with HMA “Expanded Beam” connectors, which allows interconnection of the nodes of tactical network by the help of cables with optical fibers. The used “Expanded Beam” technology preserves all advantages of signals transmission through the optical lines in field harsh environmental conditions. The switch supports a variety of management functions, including Web UI, MIB, SmartPort, SNMP, syslog, DHCP server, SPAN session. The switch is able to fit all the common 24 V DC power systems. The switch operates in wide operating temperature range -40 to +70°C. The switch can operate as standalone device or in addition the 19” brackets allow switch installation into 19” rack. Two switches can be connected on the side and mounted in a 19” rack.

Features

- Robust compact design resistant to harsh environmental conditions and rough handling
- 10G uplinks, 1G downlinks
- WAN – 2 ports of 1G/10G (copper or fiber)
- LAN – 8x 1G ports:
 - 4x of 1G combo
 - 4 ports of 10Base-T/100Base-TX/1000Base-T or LAN – 24x ports 10Base-T/100Base-TX/1000Base-T

LMSW-E33-82P-S310/D38999

LMSW-E33-242-S310/MRJ

Primary features:

10G uplinks, 1G downlinks

Enables high-quality video and data communication for next generation of bandwidth-intensive use cases such as tactical data centers, HD video surveillance, self-driving vehicles, and future-proofing

Robust compact design

A compact form factor that can withstand harsh environments (-40 to +70°C operating temperature)

Security

Enterprise-grade Cisco IOS-XE switching security features ensure highly secure voice, video, and data communication

Manageability

Facilitates easy deployment and rapid configuration with easy-to-use WEB UI and familiar Cisco CLI

Power over Ethernet

PoE standard IEEE 802.3af on request with visibility and management from Cisco IOS-XE Software

Layer 2 switching

Enables to offer enterprise-grade Layer 2 switching feature set to end customers

Quality of service

Allows customers to prioritize flows and ensure make sure that mission-critical flows are not affected by low-priority traffic

Product Specifications

Interface: RJ-45 port: ruggedized, watertight connectors

D38999: multipin connector, FO: HMA-J Expanded Beam connector

Distance: UTP cable (10Base/100Base/1000Base-T): 100 m

Power supply: 20-40 V DC

Dimensions (W x D x H) 8x LAN ports

MRJ: 220 x 400 x 60 mm (with HMA)

D38999: 220 x 380 x 90 mm (with HMA)

24x LAN ports MRJ: 440 x 400 x 90 mm (with HMA)

Weight 4.5 / 6.0 kg, MTBF: 180 000 hrs

Electromagnetic compatibility tests:

EMC – Electromagnetic compatibility: MIL-STD 461F methods RE102, CE102 CS114, RS103

LMSW-E2U

Ruggedized Ethernet Layer 2

Managed Switch

2x 1G WAN, FO HMA or RJ-45

4x LAN 10/100BASE-T

LMSW-E2U

The OPTOKON® LMSW-E2U ruggedized switch based on Cisco® technology extends switching capabilities to mobile and embedded networks that operate in extreme environments. The flexible, compact form factor of the switch, powered by advanced Cisco IOS® Software, provides highly secure data, voice, and video communications to stationary and mobile network nodes, making it ideal for use in harsh environmental conditions. The switch is able to fit all the common 24 V DC power systems. The switch operates in wide operating temperature range -40 to +75°C.

Key features

- Robust compact design resistant to harsh environmental conditions and rough handling
- 1G uplinks, 100M downlinks
 - WAN: 2(1)x ports of 1G fiber HMA or copper
 - LAN: 4x 100M ports RJ-45
- 256 MB DRAM with ECC memory
- 1 GB removable SD flash memory card (CG swap drive) – 128MB space available
- Advanced quality of service (QoS)
- Supervisory Control and Data Acquisition (SCADA)
- IEC 61850 Generic Object Oriented Substation Events (GOOSE) messaging
- Comprehensive network security features
- 20 – 40 V DC power supply

LMSW-E1

Ruggedized Ethernet Layer 2

Managed Switch

2x 1G WAN, FO HMA or RJ-45

4x LAN 10/100BASE-T with PoE/PoE+

The OPTOKON® LMSW-E1 ruggedized switch based on Cisco® technology extends switching capabilities to mobile and embedded networks that operate in extreme environments. It is an attractive entry level product as a GUI-based, lightly-managed switch. The IE 1000 is a good fit for locations with harsh temperatures and small spaces and is Power over Ethernet (PoE) capable with zero IT management. The switch is able to fit all the common 24 V DC power systems. The switch operates in wide operating temperature range -40 to +60°C.

Key features

- Robust compact design resistant to harsh environmental conditions and rough handling
- 1G uplinks, 100M downlinks
 - WAN: 2x ports of 1G fiber HMA or copper
 - LAN: 4x 100M ports RJ-45
- LAN with PoE/PoE+
- Maximum Forwarding Bandwidth 2.8 Gbps
- Maximum Switching Bandwidth 5.6 Gbps
- Input voltage range 20-40 V DC

Specifications

Rugged Design for Substation Compliance and Durability

Compliant with IEEE 1613 and IEC-61850-3 substation standards for rugged design.

Convection cooled, with no moving parts or fans for maximum reliability and reduced network outages.

Network Security

Advanced Cisco IOS® Software features such as 802.1x, Dynamic ARP Inspection, DHCP Snooping.

Layer 2 - Layer 4 access control lists (ACLs), port security, protected port/private VLAN, user network interfaces/enhanced network interfaces (UNI/ENI) in default shutdown mode and configuration file security to prevent unauthorized network access and reduce operational costs of securing the network.

High Availability and Redundancy

Advanced Cisco IOS Software features such as Resilient Ethernet Protocol (REP) and FlexLink provide fast reconvergence in ring and hub-and-spoke topologies, reducing network downtime and associated costs.

Supports Parallel Redundancy Protocol (PRP) on 8 and 16 port models.

Field-replaceable components such as power supplies and SFPs reduce redeployment time.

Redundant DC power inputs.

Easy integration:

Zero-touch IP discovery or Dynamic Host Configuration Protocol (DHCP)IP addressing and simple web GUI-based management

PnP (Plug and Play):

Automates the process of provisioning the new devices in to the network by applying configurations, installing required image without manual intervention

Manageability:

Web GUI interface, and diagnostics and analysis options through Simple Network Management Protocol (SNMP) and syslog

Security:

secure access; port-security; TACACS+ and RADIUS AAA Client: Security protocols to control access into networks

IEEE 802.1x security:

Provides an authentication mechanism to devices wishing to attach to the network. Single host mode with MAC authentication bypass

Minimize data load:

VLAN aware, Internet Group Management Protocol (IGMP) and DHCP snooping to filter unwanted data

Industrial PoE:

Four (IEEE 802.af) and PoE+ (802.3at) supported

LMSW-F6

Optical Switch

The LMSW-F series is a managed ruggedized Gigabit switch with 4-6 optical ports designed for operation in harsh environmental conditions. The optical interface is equipped with HMA-J connectors, based on "Expanded Beam" technology. This enables to use all the advantages of optical networks such as high speed data transmission over long distances in industrial networking, security automation applications, intelligent transportation systems (ITS) and are also suitable for many military and utility market applications where environmental conditions exceed commercial product specifications. The optical switch supports a variety of management functions, including STP/RSTP/MSTP/ ITU-T G.8032 Ring and multiple u-Ring for redundant cabling, layer 2 Ethernet IGMP, VLAN, QoS, Security, IPv6, bandwidth control, port mirroring, cable diagnostic and Green Ethernet.

The extended operating temperature range -40 to 75°C fulfills the special needs of field optical networks applications.

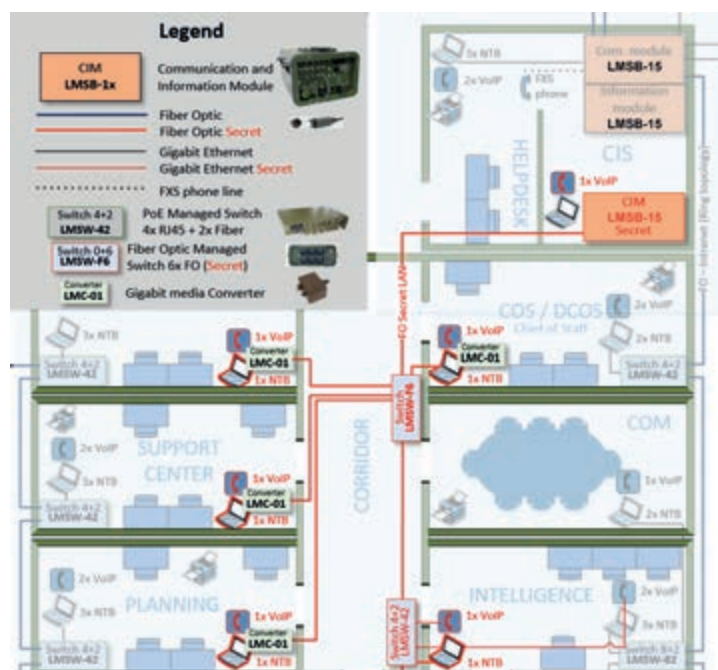

Key Features

- 6x 100/1000Base-X, HMA-J fiber optic ports
- Supports Green Ethernet IEEE802.3az EEE (Energy Efficient Ethernet) management to optimize the power consumption
- STP, RSTP, MSTP, ITU-T G.8032 Ethernet Ring Protection Switching (ERPS) for redundant cabling
- Provides 5 instances that each can support u-Ring, u-Chain or Sub-Ring type for flexible uses
- Supports up to 5 rings in one device
- u-Ring for Redundant Cabling, recovery time < 10ms in 250 devices
- DHCP client/Relay/Snooping/Snooping option 82/Relay option 82
- QoS, Traffic classification QoS, CoS, bandwidth control for Ingress and Egress, Storm Control, DiffServ
- IEEE802.1q VLAN, MAC based VLAN, IP subnet based VLAN, Protocol based VLAN, VLAN translation, GVRP, MVR
- Dynamic IEEE 802.3ad LACP Link Aggregation, Static Link Aggregation
- IGMP snooping V1/V2/V3, IGMP Filtering/ Throttling, IGMP query, IGMP proxy reporting, MLD snooping V1/V2
- Security: Port based and MAC based IEEE802.1X, RADIUS, ACL, TACACS+, HTTP/HTTPS, SSL/SSH v2
- Software upgrade via TFTP and HTTP, redundant firmware to avoid in case of upgrade failure
- Support IEEE1588 PTP V2 for precise time synchronization to operate in Master, Boundary, Slave mode by each port
- RMON, MIB II, Port mirroring, Event syslog, DNS, NTP/SNTP, IEEE802.1ab LLDP
- Supports IPv6 Telnet server /ICMP v6

Product Specifications

Standard data	IEEE 100/1000Base-X
Protocol	CSMA/CD
Interface	Optical - HMA 62.5/125 μm or 50/125 μm MM 9/125 μm SM optical cable
Wavelength	MM: 1300 nm, SM: 1310 nm, 1550 nm
Distance	MM optical cable, full duplex: 2 km SM optical cable, full duplex: 10, 30, 50, 80 or 120 km
EMC Test Regulations	EN 55022 ed.3: 2011, Class B ITE EN 61000-6-3 ed.2: 2007 + A1: 2011 MIL-STD 461E: 1999, method RE102, CE102 MIL-STD 461F methods CS101, CS114, CS115, CS116, RS103
Environmental	Fulfills MIL-STD 810E
Temperature	Operating: -40 to +75°C
Storage	-40 to +85°C
Mechanical	Fulfills MIL-STD 810G, impact, vibration
IP 63 protection	
Power supply	10 to 36 V DC
Optional power pack	
Dimensions	215 x 215 x 65 mm (W x D x H)

Classified (RED) LAN Network created using the LMSW-F6 switch

LMSB – 14.1G

Ruggedized Switchboard, - extension gateway

LMSB-14.1G gateway

The LMSB-14.1G introduces a ruggedized gateway for connection to the PBX - switchboard designed for use in harsh environmental conditions. It offers FXS ports for analogue phone sets, FXO ports for connection to PBX lines, E&M interfaces for cooperation with radio systems and an E1 digital line. The LMSB-14.1G gateway can be connected to a tactical network via 100 Mbps Ethernet line or via an up-link port based on optical fibers cable, which is equipped with an HMA Expanded Beam connector. Four channels GSM module available on request. The LMSB-14.1G power supply can be ensured from any DC source 10.5 - 36 V. The LMSB-14.1 switchboard can be mounted on a vehicle as well as deployed on a stationary workstation.

Features

- Robust compact design resistant to harsh environmental conditions and rough handling
- VoIP gateway with application in SIP trunking, PBX IP
- Trunking and PSTN access for local IP tel. solutions.
- OS Linux, Asterisk SW
- WAN interface:
 - 1x 10/100Base-T(X) RJ-45 port
 - 1x 10/100Base-T(X) RJ-45 port or 1x FO optical interface¹
- FXS interfaces², FXO interfaces³, E&M ports 1x E1 port
- Console port
- Power supply 10.5 – 36 V DC

Note: 1) FO HMA port on request, either MM or SM

2) Four FXS interfaces terminated in one RJ-45 socket

3) Four FXO interfaces terminated in one RJ-45 socket

Technical Parameters

WAN Interface

FO Connector	HMA-J ⁴
Fiber type	MM: 62.5/125 μm, 50/125 μm or SM: 9/125 μm
	Data rate 10/100 Mbps
Wavelength	MM: 1300 nm SM: 1310, 1550 nm
UTP Connector RJ-45	Data rate 10/100 Mbps
	Cable 10Base-T Cat. 3, 4, 5, UTP, 10/100Base-TX Cat.5, 5e or higher

Note: 4) HMA-J (Expanded Beam) standard, other on request

FXS - analogue phone port

Voice codecs: G.729a, G.726, G.711, GSM
 Call Control Protocols: SIP
 Telephony Signaling: DTMF tone detection/generation, DTMF relay: in-band, RFC 2833 and SIP info
 Call forward: unconditional, no answer and busy
 Number of channels: 10 at once

Subscribers interface: Subscriber lines: FXS, FXO, E&M,

Console Connector: 1x RJ-45 – serial line
 RS232: Data rate 115.200 kbps, 8 bits, 1 stop bit, no parity

Application diagram:

Ordering code:

LMSB-14.1G	-	UTP XX - XX	-	FXS - FXO - EM - E1 ^{5,6,9}	-	DC	(/GSM4)
WAN uplink port: UTP / Fiber Optic		Analogue/ digital interface		Power supply ⁸			
XX: Fiber optic		XX: Distance (FO)		FXS	4, 8, 12 - 32 FXS ports	DC:	
M5	MM 50/125 μm	XX ⁷	Multimode	FXO	2, 4, 6 - 16 FXO ports	10.5-36 V DC	
M6	MM 62.5/125 μm	10	10 km	EM	2, 4, 6 E&M		
S3	SM 1310 nm	30	30 km	E1	1x E1 2 Mbps		

Note:

5) define the number of relevant ports

6) other types of interface available upon request (MB, BRI, ..)

7) MM fiber – the distance depends on fiber type, up to 2 km.

SM fiber – other wavelength and distance on request

8) standard power supply: DC, please define if required different

LMCP-7H

Compact, ultra-durable server

8th Generation Intel® Core™ processor i7-8665UE with 4 cores

Dual Channel DDR4-2400 up to 32 GB, eMMC up to 64 GB

2x1 Gbps Ethernet

LMCP-7H

The OPTOKON compact, ultra-durable LMCP-7A server is equipped with 8th Gen Intel® Core™ CPU, SSD discs and 2x Gigabit Ethernet ports. The LMCP-7A supports up to 64 GB of DDR4 memory, resulting in a reduction in overall power consumption compared to DDR3-based servers.

The LMCP-7A offers military grade features in a rugged housing making it the ideal platform for applications in harsh and rugged environments. The LMCP-7A can operate in harsh environments under a temperature range from -40 to +85 °C. The power supply is possible from any DC voltage within range 20 – 40 V DC input design. Sealed against dust and debris, our Rugged Line stands up to shocks, vibrations and wide temperature range.

Advanced features

- Rugged design for harsh environmental use
- Whiskey Lake-U 14 processor 1.70 -4.40 GHz
- 64 GB total RAM
- Dual removable high capacity SSD discs
- 2x 1 GbE
- MRJ connectors
- Extended operating temperature range
- Wide power supply voltage range: 20-40 V DC
- Compact small design, light weight

LMCP – SW

Basic operating software for LMCP mobile computing platform:

- LMCP-28H-NG
- LMCP-41H
- LMS-41

The OPTOKON LMCP series introduces the new generation of highly versatile mobile computing platform which delivers a powerful and rugged network router, network switch, server and VoIP call manager.

The system is equipped with power full Intel® Xeon® processor, high capacity RAM, two removable Storage disc SSD and wide range of connection ports, both fiber optic and copper wires.

Basic SW configuration

Specification

Processor: Intel® Core™ i7-8665UE quad core processor with 1.7 GHz, 8 MB Intel® Smart Cache, Intel® UHD Graphics 620

Memory: Dual Channel DDR4-2400 up to 32 GB, onboard eMMC up to 64 GB

Interface¹:

- 2x 10/100/1000 Mbps Ethernet
- 1x RS-232/422/485
- 4x USB 3.1
- 2x USB 2.0
- 1x HDMI1.4 / 1x DP1.2
- 1x CAN Bus 2.0

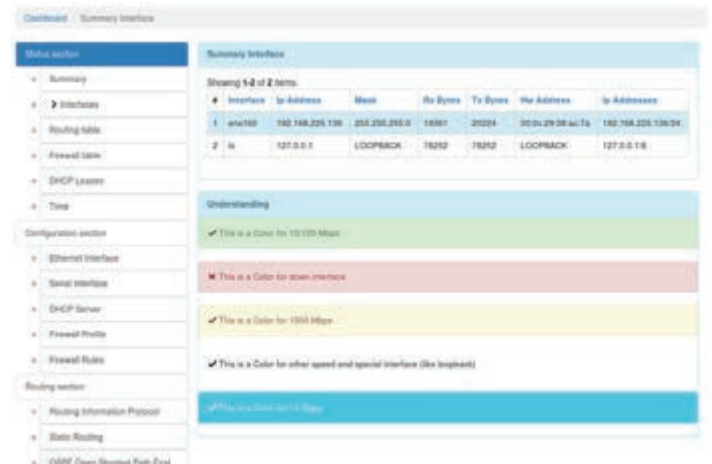

Discs²:

- 2x SSD 256 GB, remove able
- M.2 M-Key 2280 supports NVMe
- OS support list: Linux, Windows 10, iManager & SW APIs, WISE-PaaS/DeviceOn

Mechanical & Environmental:

- Size W x H x D: 180 x 100 x 210 mm (W x H x D)
- Weight: 4.9 kg
- Power supply: 20 - 40 V DC
- Power consumption: 35 W
- Operating temperature: -40 °C to +85 °C
- Storage temperature: -40 °C to +85 °C
- Environmental design complies with MIL-STD-810G
- EMC – Electromagnetic compatibility: MIL-STD-461F: RE102, CE102, CS114, RE103,

Note: 1) Other interface (general purpose digital I/O, Line-in/Line-out/MIC ...) on request
2) Other disc capacity on request

Example of SW window:

LMCP-28H-NG

Light Mobile Computing Platform

2x 100/1000Base-X HMA uplinks

8x 10/100/1000Base-T switched PoE LAN ports

3x or 5x 10/100/1000Base-T routed WAN ports

-1x of them 10GBase-T

LMCP-28H-NG Mobile computing platform

The OPTOKON introduces the LMCP-28H-NG new generation of highly versatile mobile computing platform which delivers a powerful and rugged network router, network switch, server and VoIP call manager in a single low-SWaP device. As the center of the mobile data network, it provides an integrated and versatile communications server for military, public safety, C4ISR and other network-centric communications systems.

The system is equipped with power full Intel® Xeon® processor which delivers exceptional value and unmatched performance density per watt in an SoC package, high capacity RAM, two removable Storage disc SSD and wide range of connection ports, both fiber optic and copper wires. The LMCP is available in rugged boxes to fill all demands on communication system used in harsh environmental conditions. Fiber optic ports are equipped with rugged HMA connectors operated according to Expanded Beam technology, which allows to use all advantages of highspeed data transmission in field conditions.

Advanced features

- Robust compact design resistant to harsh environmental conditions and rough handling
- Intel® Xeon® processor D-1500 product family
- Up to 64 GB RAM ECC DDR4 2400 MHz
- Dual removable SSD 2.5 inch
- On board expansion slot M.2 NVMe PCI-E 3.0 x4
- 1x 10GBase-T of 3/5 routed 1 GbE ports
- 8x 10/100/1000Base-T switched PoE+ ports
- 2x 100/1000Base-T/X ports4
- Advanced PoE+ management, max. output power budget 60 W
- Circular connectors MIL-DTL-D38999 series
- Linux-based router solutions supports a multitude of routing protocols
- Wide range power input 20-40 V DC
- Passive fan less cooling, no-moving-parts

LMCP-28H-NG Mobile computing platform in stack with LMSW-E33 switch

Features and Benefits:

Server:

Intel® Xeon® processor D-1528
9 MB, 6-Core, 12 Threads 1.9 GHz
System memory up to 64 GB DDR4 2133 MHz

Solid State Drives

1x M.2 NVMe PCI-E 3.0 x4, up to 512 GB
Dual removable 2.5" SATA SSD up to 2x 2 TB
2 Drive Tray less Hot Swap SATA Mobile Rack
iData Guard for abnormal power failure

Input / Output

Up to 7 routed 1 GbE ports
Linux-based router solutions supports RIP v1, v2 and OSPF v2
10 GbE 1x of 7 ports
10x USB 2.0 and 1x USB 3.0
8x serial RS232
CAN bus, High-speed CAN transceiver 82C251
Video VGA port

Switch:

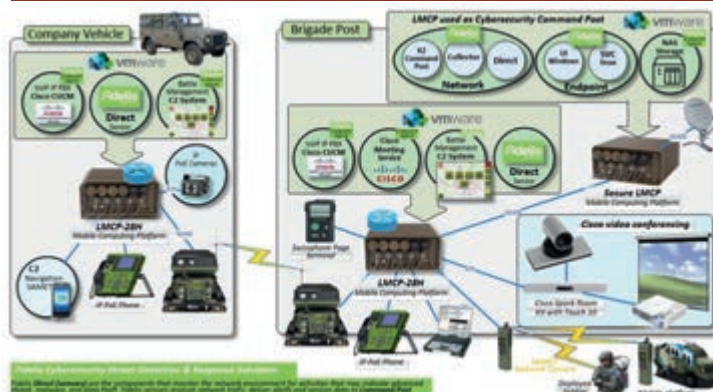

8x 10/100/1000Base-T LAN RJ-45 ports with PoE
2x 1 Gbps or 1x 1/101 Gbps fiber optic HMA connectors or UTP, RJ-45

Management and monitoring

IPMI with dedicated LAN, Support for Intelligent Platform Management Interface v2.0 with virtual media over LAN and KVM-over-LAN
HW Monitoring (CPU, temperature, voltage, failure,...)
HW Notifications sent via email and SNMP traps

Power consumption

Nominal conditions 75 W
Maximum load 120 W + PoE power budget 60 W

LMCP-41H

Mobile Computing Platform

8-Core CPU Intel Xeon, 128 GB RAM

5x 10/100/1000Base-T routed WAN ports

2x 100/1000Base-X + 8x 10/100/1000Base-T
switched PoE LAN ports

The LMCP is highly versatile mobile computing platform which delivers a powerful and rugged network router, network switch, server and VoIP call manager in a single low-SWaP device. As the center of the mobile data network, it provides an integrated and versatile communications server for military, public safety, C4ISR and other network-centric communications systems.

Features

- Robust compact design resistant to harsh environmental conditions and rough handling
- Intel® Xeon® processor D-1500 product family
- Up to 128 GB RAM ECC DDR4 2400 MHz
- Dual removable SSD 2.5 inch
- On board expansion slot M.2 NVMe PCI-E 3.0 x4
- 8x 10/100/1000Base-T switched PoE+ ports and 2x 100/1000Base-X ports
- Advanced PoE+ management, max. output power budget 60 or 100 W
- Circular connectors MIL-DTL-D38999 series
- Linux-based router solutions supports a multitude of routing protocols
- Wide range power input 20-30 V DC
- Removable filter less fan cabinet cooling

LMS-41H-2U

Rugged Fanless Server

Up to 128 GB RAM

8-Core Intel Xeon

The OPTOKON introduces highly versatile mobile Server in a single low-SWaP device. As the center of the mobile data network, it provides an integrated and versatile server for military, public safety and C4ISR systems.

The system is equipped with power full Intel® Xeon® processor witch delivers exceptional value and unmatched performance density per watt in an SoC package, up to 128 GB RAM, two or four removable Storage discs SSD and wide range of connection ports, both fiber optic and copper wires. The LMS is available in rugged boxes to fill all demands on communication system used in harsh environmental conditions and Extended operating temperature (-20 to 60°C).

LMS-41H features

- Robust compact design resistant to harsh environmental conditions and rough handling
- Intel® Xeon® processor D-1541
- Up to 128 GB RAM ECC DDR4 2400 MHz
- On board SSD disc M.2 NVMe and 2x Dual removable SSD 2.5
- 2x 10/100/1000Base-T ports and
- 2x 1000Base-X FO uplinks
- Rugged MRJ connectors series
- Linux-based router solutions supports a multitude of routing protocols

LMCP-41H Mobile computing platform

Features and Benefits:

Server: Intel® Xeon® processor D-1541 (12 MB, 8-Core, 16 Threads, 2.1 GHz)
System memory Up to 128GB DDR4 2133MHz

Solid State Drives

1x M.2 NVMe PCI-E 3.0 x4, up to 1024 GB
Dual removable 2.5" SATA SSD up to 2x 2 TB
2 Drive Trayless Hot Swap SATA Mobile Rack
iData Guard for abnormal power failure

Input / Output

3 or 5 routed 1 GbE, Linux-based router solutions supports RIP v1, v2 and OSPF v2
8x USB 2.0 and 1x USB 3.0 and 8x serial RS232
CAN bus, High-speed CAN transceiver 82C251, Video VGA port Switch
8x GbE LAN RJ-45 ports with PoE+
2x GbE Fiber Optic HMA connectors

Management and monitoring

IPMI with dedicated LAN, Support for Intelligent Platform Management Interface v2.0 with virtual media over LAN and KVM-over-LAN
HW Monitoring (CPU, temperature, voltage, failure,...)
HW Notifications sent via email and SNMP traps
Nominal power conditions 85 W
Maximum load 130 W + PoE power budget 120 W

LMS-41-2U/MRJ

Features and Benefits:

Server: Intel® Xeon® proc. D-1541 (8-Core, 16 Threads, 12 MB Cache, 2.1-2.7 GHz)
Up to 128 GB ECC RDIMM DDR4 2400 MHz or 128 GB ECC/non-ECC UDIMM

Solid State Drives

1x M.2 NVMe PCI-E 3.0 x4, M Key 2242/2280 up to 480 MB
2x Dual removable 2.5" SSD Drive Trayless Hot Swap SATA Mobile Rack
SATA3 (6 Gbps); RAID 0,1,5,10 RSTe up to 4x 1 TB
iSMART disk health monitoring, iData Guard for abnormal power failure

Management and monitoring

KVM with dedicated LAN, Support for Intelligent Platform Management Interface v2.0 with virtual media over LAN and KVM-over-LAN
Hardware Monitoring (temperature, voltage, power failure, power consumption, disk health, and memory health)
HW Notifications sent via email and SNMP traps
Monitors for CPU Cores, System level control

Input / Output

Panel Mount Receptacle
2x FO HMA, 2x GbE RJ-45, 1x KVM with dedicated LAN RJ-45, 2x USB 3.0, 4x USB 2.0, 1x RS232, Video VGA port
Power input 10.5-36 VDC, Nominal conditions: 65 W, Maximum load: 95 W
EMC Standards According to MIL-STD-461G

LMSR-R63

Ruggedized next Gen Gigabit Router 2x GE WAN + 4x GE LAN ports

LMSR-R63/MRJ

LMSR-R63/RJFTV

The OPTOKON LMSR-R63 ruggedized router based on Cisco Next Gen GE Embedded Router 6300 is optimized for military networks that require IP routing and services. The compact router provides highly secure data, voice, and video communications to stationary and operational tactical network nodes.

The OPTOKON LMSR-R63 is a high-performance, ruggedized router designed for use in harsh environments—offering reliable operation in extreme temperatures and under shock and vibration conditions typical for mobile applications in rugged terrain. With onboard hardware encryption, the router offloads encryption processing from the routing engine to provide highly secure yet scalable video, voice, and data services for mobile and embedded outdoor networks. The router offers high performance, five Gigabit Ethernet interfaces (two routed and four switched), and a rich Cisco IOS Software feature set, providing investment protection for customers deploying bandwidth-intensive applications in mobile or embedded networks in heavy industrial, public safety, transportation, defense, and energy markets.

The router supports a variety of management functions, including Cisco DNA, Web UI, IOx, MIB – SNMP (version 2 and 3), syslog etc. It is able to fit all the common 24 V DC power systems. The router operates in wide operating temperature range -40 to +70°C and can operate as a stand alone device or it can be installed into 19" rack.

Features

2 GE WAN, 4 GE LAN,

The router LMSR-R63 provides two routed and four switched Gigabit Ethernet interfaces, enabling the router to serve as an aggregation point for on-demand network connectivity in mobile or fixed deployments.

Robust compact design

A robust and compact design that can withstand harsh environments (-40 to +70°C operating temperature)

Security

Enterprise-grade Cisco IOS-XE switching security features ensure highly secure voice, video, and data communication, with support FIPS-140 certified Security – IPsec, Suite-B

Manageability

Facilitates easy deployment and rapid configuration with easy-to-use WEB UI and Cisco DNA (Cisco Digital Network Architecture)

- Interface support:
 - 4 GE LAN ports, RJ-45 interface
 - 2 GE WAN ports, RJ-45 interface
 - (4x FXS ports – option)
- Crypto throughput (250 Mbps)
- 1 x RS-232 and USB console
- Advanced next generation Cisco IOS-XE SW
- Low power 12 W consumption

Specifications:

6 x RJ-45 port: ruggedized, watertight connectors (MRJ or RJFTV)	
Routing protocols	
Simple Network Management Protocol (SNMP) Versions 2 and 3	
Telnet	
Console port	
RADIUS	
TACACS+	
Cisco Service Assurance Agent	
Syslog	
Response Time Reporter	
Network Time Protocol (NTP) Client	
Trivial File Transfer Protocol (TFTP) Client and Server	
Dynamic Host Configuration Protocol (DHCP) Client and Server	
DHCP Relay	
Hot Standby Router Protocol (HSRP)	
Radio routing	
Radio-Aware Routing (RAR)	
Dynamic Link Exchange Protocol (DLEP)	
VLANs	
Up to 32 VLANs supported per router	
IPv4 and IPv6	IPv4 support, IPv6 (routing and Cisco Express Forwarding switching, IPv6 QoS, IPv6 tunneling support, Cisco IOS Zone-Based Firewall for IPv6 traffic)
Security protocols: IPsec, SSL/TLS, SRTP, 3DES, AES, IKE	
Voice - Cisco Unified Communications Manager Express	
With support for up to 48 phones	
QoS – traffic management	
Generic traffic shaping	
Class-based Ethernet matching and mobile access routing (802.1p class of service)	
Committed access rate	
Flow-based Weighted Random Early Detection (WRED)	
Class-Based Weighted Fair Queuing (CBWFQ)	
Low Latency Queuing (LLQ)	
Priority Queuing	
Weighted Fair Queuing (WFQ)	
Link fragmentation and interleaving (LFI)	
Traffic Policing Resource Reservation Protocol (RSVP)	
Dimensions W x D x H MRJ connectors	220 x 400 x 60 mm
Dimensions W x D x H RJFTV connectors	220 x 380 x 90 mm
Weight	5.0 kg
Power supply	20 - 40 V DC power supply

LMSW-E33 and LMSR-R63
Installation into 19" Rack

LMIPT-41

High-class Rugged IP Phone

Proven Cisco technology
Five programmable line keys
Encrypted voice communications
Widescreen VGA backlight color display

The OPTOKON LMIPT-41 is a rugged IP phone specifically designed for use in harsh environmental conditions. The IP phone delivers the latest technology and advancements in IP telephony based on the Cisco 8841 platform and provides communication over the same data network as your computer, allowing you to place and receive phone calls, put calls on hold, transfer calls, make conference calls, etc. The OPTOKON LMIPT-41 is built into a fully sealed and vibration proof aluminum chassis.

The LMIPT-41 offers five programmable line keys. The keys can be configured to support either multiple directory numbers or call features such as speed dial. Productivity can be boosted by handling multiple calls for each directory number, using the multi call-per-line feature. Fixed function keys provide one-touch access to applications, messaging, the directory, as well as regular call features such as hold/resume, transfer, and conference. The backlight acoustic keys provide flexibility for audio path selection and switching.

Key Features

- The OPTOKON LMIPT-41 offers a 5-inch high-resolution (800 x 480) widescreen VGA backlight color display. Localized language support, including right-to-left on-screen text, meets the needs of global users.
- The phone supports a built-in Gigabit Ethernet switch for PC connection.
- Support for Cisco EnergyWise™ technology makes the IP phone more energy-efficient and eco-friendly; the phone is qualified by the Energy Star organization.
- Stand alone or wall mount version can be ordered.

The phone has the following keys

- Line keys, Soft keys
- Back and release keys
- Four-way navigation and select keys
- Hold/Resume, Transfer, and Conference keys
- Messaging, Application, and Directory keys
- Standard keypad
- Volume-control toggle key
- Speakerphone, headset, and mute keys

Audio codec support: G.711a-law and μ -law, G.722, G.729a, Internet Low Bit rate Codec (iLBC), and Internet Speech Audio Codec (iSAC)

LMIPT-41 Specifications

Ethernet switch and PoE

An internal 2-port Cisco Ethernet switch allows for direct connection to a 10/100/1000BASE-T Ethernet (IEEE 802.3i/802.3u/802.3ab) through an RJ-45 interface with single LAN connectivity for both the phone and a co-located PC. The system administrator can designate separate VLANs (IEEE 802.1Q) for the PC and phone, providing improved security and reliability of voice and data traffic IEEE Power over Ethernet class 2. The phone is compatible with both IEEE 802.3af and 802.3at switchblades and supports both Cisco Discovery Protocol and Link Layer Discovery Protocol - Power over Ethernet (LLDP-PoE).

Network features

Session Initiation Protocol (SIP) for signaling
Session Description Protocol (SDP)
IPv4 and IPv6
User Datagram Protocol (UDP) (used only for Real-Time Transport Protocol [RTP] streams)
Dynamic Host Configuration Protocol (DHCP) client or static configuration
Gratuitous Address Resolution Protocol (GARP)
Domain Name System (DNS)
Trivial File Transfer Protocol (TFTP)
Secure Hypertext Transfer Protocol (HTTPS)
VLAN
Real-Time Transport Protocol (RTP)
Real-Time Control Protocol (RTCP)
Cisco Peer-to-Peer Distribution Protocol (PPDP)
Cisco Discovery Protocol
LLDP (including LLDP-MED)
Switch speed auto-negotiation

Security features

Secure boot
Secure credential storage
Device authentication
Configuration file authentication and encryption
Image authentication
Random bit generation
Hardware cryptographic acceleration
Certificate Authority Proxy Function (CAPF)
Manufacturer-Installed Certificates (MIC)
Locally Significant Certificates (LSC)
Ethernet 802.1x supplicant options: Extensible Authentication Protocol-Flexible Authentication via Secure Tunneling (EAP-FAST) and Extensible Authentication Protocol-Transport Layer Security (EAP-TLS)
Signaling authentication and encryption using TLS
Media authentication and encryption using SRTP
HTTPS for client and server
Secure Shell (SSH) Protocol server
SSL-based VPN client

LMIPT-21

Rugged IP Phone

Proven Cisco technology
Power over Ethernet (PoE)

LMIPT-21

OPTOKON LMIPT-21 is a rugged IP phone specially designed for use in harsh environmental conditions. The phone offers an easy-to-use interface and provides a traditional telephony-like user experience. Fixed function keys give you one-touch access to service, messaging, directory, hold/resume, transfer, and conference features. The phone is based on a Cisco IP Phone 7811. It is built into a fully sealed and vibration proof aluminum chassis.

Features

- Rugged design for harsh environmental use
- Voice services on Cisco or third-party platforms
- Supports CDP and 802.1Q/p standards
- Signaling protocol: SIP Session Initiation Protocol
- Codec support: G.711a/μ, G.722, G.729a, iLBC, OPUS
- Cisco Unified Communications Manager 8.5.1, 8.6.2, 9.1.2, 10.x and later
- Display 3.28" 384x106 pixel-based
- Colors: Box-green RAL 6014, handset-black, keyboard-BW

Specifications

Security:

- 802.1X authentication
- Media encryption using Secure Real-Time Transfer Protocol (SRTP)
- Signaling encryption using Transport Layer Security (TLS) Protocol
- Encrypted configuration file, digest authentication, password login, HTTPs secure provisioning
- Mandatory/optional secure call

Environmental and dimensions:

- IP 65 protection
- Operating temperature: -20 to +55 °C, MIL-STD-810G Method 501.5 procedure II
- Storage temperature: -20 to +65 °C, MIL-STD-810G Method 501.5 procedure I
- Dimensions: 250 x 215 x 45 mm (L x W x D)
- Weight: 2.8 kg

LMAT-116

Rugged Analog Phone

OPTOKON LMAT-116 is a rugged analog phone specially designed for use in harsh environmental conditions. The phone offers an easy-to-use interface and provides a traditional telephony user experience.

Features

- Manufactured in accordance with military standards and fulfill all of its functions completely under vibration and shock conditions
- Designed for the harsh environment of ships and military use with high vibration and shock effect.
- Guarantees continuous working under humidity, salty and extreme temperature conditions in ships and land forces
- CB – central battery operation
- Although it is used at military vehicles, the phone is ergonomics for easy use.
- Ring tone and volume adjustment.
- Back light level adjustment at keypad.
- The handset cord is selected appropriate to the security norms set in the highly shocked environments
- DTMF - Dual-tone multi-frequency signaling

LMAT-116

Specifications

- Dimensions: 245 x 183 x 94 mm
- Weight: 1.93 kg
- Color: black
- Operating temperature: -32 to +60 °C, MIL-STD-810G, method 502.4, procedure II, method 5021.4, procedure II
- Storage temperature: -33 to +63 °C
- Mechanical Waterproof and dust protection: IP55
- Vibration: MIL-STD-810G, method 514.6, procedure I, category 20
- Shock: MIL-STD-810G, method 516.6, land vehicles
- EMC/EMI: MIL-STD-461F: RE102, CE102, RS103, CS101, CS114, CS115, CS116

LMUPS-80-24V

**Ruggedized
Uninterruptible Power Supply**

Input AC/DC
Output 24 V DC, 15 A

LMUPS-80-24V

The LMUPS-80 Series is a high efficiency, DC power supply and battery charger that brings sophisticated features into a ruggedized design. The LMUPS-80 allows the battery charge to be regulated independently from the DC outputs, meaning that the battery will always receive the optimal charging current without the load being affected. Intelligent 3-stage charging will bring a battery back to a full state of charge much faster than trickle or float charging can.

In addition, the LMUPS-80 offers various functions like min. load disconnect, battery disconnect and external signal shutdown. Through the Battery-Parameter software adjustments at the UPS can be done via PC.

Features

- 24 V DC UPS device
- Ruggedized design 3 RU height box
- Operates as a DC UPS, providing uninterrupted DC power
- Wide-ranging power factor corrected AC/DC input
- Battery hot swap
- Easy battery access - separate battery compartment

LMCAB LAN Cables

Ruggedized high reliability Ethernet cord sets

The cable contains 4 twisted pairs, cabled, double shielded with kevlar reinforcement strands, jacketed in black UV resistant Polyurethane HFFR. Designed for fixed or portable applications in harsh environments.

LMCAB-RJ45-RJFTV6MG-RJ45

Main characteristics

- Sealed against fluids and dusts (IP68)
- Shock, vibration and traction resistant
- No cabling operation in the field and no tools required
- Mechanical coding / Polarization (4 positions)
- Improved EMI protection
- Tri Start Thread coupling mechanism (D38999 series III type) with anti-decoupling device - Shell size 19
- Robust aluminium shells, olive drab cadmium plating
- RJ45 cord set retention in the plug: 100 N in the axis
- Mating cycles: 500 min

Product Specifications

Power:

Input Voltage Range 176-242 V AC / 22-29 V DC

Output Voltage 24 V DC

Output voltage/on network operation/for DC/nominal value 24 V

Output voltage/in buffering mode/with DC/rated value 24 V

Voltage increase time/of the output voltage/typical 1 s - 60 ms

Output current/nominal value 15 A

delivered active power/typ. 360 W

Active power loss/during battery operation/typical 15 W

Protection an monitoring

protection against reverse battery voltage polarity Yes

protection against polarity reversal on input voltage Yes

Mechanical:

Dimensions 430 x 275 x 3U1 mm (W x D x H)

Weight 8 kg

Protection degree IP65

HMA-J Series

Harsh Environmental Expanded Beam

HMA-J plug connector

The OPTOKON HMA-J connector series, a medium size Expanded Beam connectors, is designed for connecting tactical network nodes using fiber optical cables. The expanded beam technology preserves all the benefits of signal transmission through optical lines in harsh environmental field conditions. In addition to military optical networks the HMA-J is suited for a vast array of applications, such as heavy industry connections, petrochemical applications and temporary optical lines used for broadcasting.

The innovative design ensures it can be deployed in the toughest environments, where high performance and total reliability are critical. Benefiting from expanded beam technology, the precision optical alignment system provides immunity from water, mud, dust, oil and other contaminants. The HMA-J Hermaphroditic coupling eliminates the need for adaptors and male and female mating halves. Hermaphroditic housings allow for rapid deployment, creating low loss Single mode and Multimode daisy chained links in a variety of platforms ranging from simplex fiber to four fibers. The OPTOKON HMA-J is ideally suited for environmental extremities where low maintenance and quick repairability are required.

MIL-DTL-83526 specification

HMA-M Series

Harsh Environmental
Expanded Beam Connector

HMA-M plug HMA-J plug HMA-S plug

The OPTOKON HMA-S connector series (large size Expanded Beam connector) and the HMA-M connector series (a mini-sized Expanded Beam connector) are designed to connect tactical network nodes using fiber optical cables. The Expanded Beam technology preserves all the benefits of signals transmission through suitable optical lines in harsh environmental field conditions. In addition to military optical networks, the HMA-S/M connectors are suitable for a vast array of applications, such as heavy industry connections, petrochemical applications and temporary optical lines used for broadcasting.

The innovative design ensures it can be deployed in the toughest environments where high performance and total reliability are critical. Benefiting from expanded beam technology, the precision optical alignment system provides immunity from water, mud, dust, oil and other contaminants. HMA Hermaphroditic coupling eliminates the need for adaptors and male and female mating halves. Hermaphroditic housings enable rapid deployment, creating low loss Single mode and Multimode daisy chained links in a variety of planforms ranging from simplex fiber to four fibers. The OPTOKON HMA is ideally suited for environmental extremities where low maintenance and quick repairability are required.

Benefits

- Best optical performance available
- No adaptors required
- Combined fiber and electrical channels
- Inexpensive, low downtime field repair
- Easy to clean, no special tools

Key Features

- Advanced expanded beam technology
- Hermaphroditic interconnection
- 1 to 8 HMA-S (1 to 4 HMA-M) SM or MM fiber channels
- Rugged field repairable connector design
- Keyed boot for 'Blind Mating'
- HMA-S Hybrid electrical & fiber channel options available
- HMA-S is fully compatible with other HMA connectors and with the Pro Beam Senior connector

Specifications

Optical Loss HMA-S	50/125 @ 850/1300 nm: 1 to 4 channels: 1.0 dB max 6 & 8 channels: 1.5 dB max 9/125 @ 1310/1550 nm: 1 to 4 channels: 1.5 dB max 6 & 8 channels: 2.0 dB max

Optical cables

for mobile and tactical use

Based on military norm MIL-C-85045

LD-04-OM2-PUR-BK

LD single jacket cable

Tactical optical cables with 2-12 fibers. This cable type has a number of tight buffered optical fibers, surrounded by a heavy layer of aramid yarns. The jacket is made of polyurethane. The cable is suitable for indoor and outdoor use. The cable has low abrasion and good cut resistance.

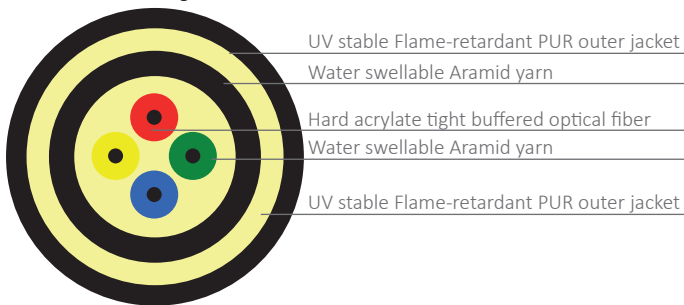

LD cable jacket

OPHC-02-3C

OPTOKON hybrid connector-adapter
(fiber optic + copper wires)

OPHC-04

The OPTOKON OPHC-xx series connector-adapter introduces hybrid rugged design fiber optic – copper wires connector. The OPHC includes the LC duplex adapter and electrical contacts in rugged housing, which allows interconnection of hybrid cables: two optical fibers terminated with LC connectors and up to three copper wires.

Application

- Army and air force tactical networks
- Oil research, heavy industry, FTTH and broadcasting
- Connection to moving objects

Typical configuration1:

OPHC-02-3C: 2x FO (LC connector) + 3x Cu wires

Note: 1) on request

OPHC-04: 4x FO (LC connector)

MCS-04

Mini cable splice & OMK-SR-MCS tool kit

The OPTOKON MCS-04 provides low cost, field usable, quick repairs to tactical cables in the toughest of environments. Utilising the proven mechanical splice in both single mode and multimode applications, there is no need for power, heat or complicated termination procedures.

The OPTOKON OMK-SR-MCS Mini cable splice tool kit introduces a cost effective version of the J-type MCS – Mini Cable Splice. The tool kit provides all necessary tools and components for field usable, quick repairs of tactical cables in the toughest of environments. Utilizing the proven mechanical splice in both single mode and multimode applications, there is no need for power, heat or complicated termination procedures.

MCS-04

Application

- Harsh environmental use
- Metal closure housing
- Proven mechanical splice technology
- 1 to 4 fiber Multimode or Single mode
- Fully field repairable

OMK-SR MCS
Includes all necessary tools
for optical cable mechanical splicing

LMJB-6

6-pairs Surge Protected Junction Box

The LMJB-6 Junction Box is designed for splitting of incoming multi pairs copper cable into a separate phone/data link. The heavy-duty junction box is designed for use in high-risk environments where the cost of failure is significant.

The LMJB-6 unit is designed to protect, against surge voltages, and terminals connected to telephone or data networks. The electrical diagram is based on GDT and clamping diodes to guarantee maximum efficiency. The protection printed circuit is removable for easy and fast maintenance.

Functionality:

- Interface: RJ-45 port, ruggedized, watertight connectors
- RJ TV series
- Mating cycles : 500 min
- 10 BaseT, 100 BaseTX and 1000 BaseT networks Cat. 6
- Mechanical: Fulfils MIL-STD 810G, IP 65 protection
- Salt Spray : > 500 h with Olive Drab Cadmium
- Thermal Shock: 5 cycles at -40 °C / +100 °C
- Temperature Range : -40 °C / +85 °C
- Dimensions: 430 x 275 x 65 mm (W x D x H)
- Weight 4 kg

Cable Drums

BBD-500NR

OPTOKON provides high quality deployable cable drums. Users can select the appropriate design and style for their particular application. The drums are ideally suited to Military, Industrial, Broadcast and pro Audio applications. All drums are supplied with a third flange to enable full access to each end of the cable assembly. The drums are delivered in standard black color RAL 9005 mat. Other - green khaki RAL 6014 mat color is available upon request.

BBD-200, BBD-500NR, BBD-1000

BBD-200/500
NSN: 8130160045567

Heavy duty drum with direct crank rewind permanently attached to the axle. Designed for installation on military vehicle or a TBD-500 type trolley suitable for mobile applications.

The drum BBD-500NR is designed for winding of up to 500 m cable diameter 5.5 mm. Type BBD-1000/1500N is wider and allows storage up to 1/1.5 km cable diameter 5.5 mm.

Weight: BBD-500NR:11.4 kg, BBD-1000:13.3 kg, BBD-1500N:15.5 kg

Termination, Repair & Maintenance tool kits

OMK-SR-UNI.2

OMK-SR-UNI.2 Termination & Repair Tool Kit is designed for military connectors. Tool Kit is delivered in aluminum case suitable for military tactical applications. Tool Kit includes all necessary instruments and accessories for termination of harsh environment fiber optic connectors. All instruments are placed in special pre formed plastic foam secures tooling during transit and allows simple checking inventory. Tool Kit is designed for harsh environmental conditions use: water resistant, temperature range -40 °C to +80 °C, resistant to UV and magnetic emission.

OMK-SR-UNI

OMK-SR-SPL.2

NSN : 5180160065290

OMK-SR-SPL.2 Quick Repair Tool Kit is delivered in anticorrosive case. All instruments are placed in special pre formed plastic foam secures tooling during transit and allows simple checking inventory. Surface of case can be washed.

Specifications

Standard:
MIL STANDARD MIL-C-4150J
IP67 in accordance with EN60529/91 & IEC60529/68
Air Transportation Association Spec. 300

OMK-SR-CLN.2

NSN: 518016AB25384

The Maintenance Clean Kit is intended for cleaning and inspecting of military optical connectors. It contains all of the necessary tools for cleaning fiber optic components. The Kit tools are housed in the water/airtight, unbreakable NATO codified case. They are further protected with pre-moulded cut to fit each item. Case is made from extremely resistant Copolymer Polypropylene and equipped with automatic pressure release valve. Due to the copolymer polypropylene and extra-thick wall is not get scratched or damaged easily.

Equipment

- Adapter LC/MU for Microscope 100x
- Cotton swabs (pack 5 pcs)
- Cleaning cartridge-CLETOP
- Cleaning wipes (pack)
- Microscope 100x
- Dust cleaner
- Visible pen VSP-03-125
- Visible pen VSP-03-250

OMK-SR-FSK.2

The OPTOKON Splice Kit OMK-SR-FSK is intended for the quick repair of damaged or broken mobile tactical optical cables. The Kit contains portable mobile fusion splicer S121A and all necessary splicing tools. The Kit tools are housed in a water/airtight, unbreakable NATO codified case. All tools are further protected with pre-moulded cut to fit each item. The Case is made from extremely resistant Copolymer Polypropylene and equipped with automatic pressure release valve.

OMK-SR-OTS.2

Diagnostic Set

NSN: 665016AA53320

The diagnostic set includes measuring instruments and tools for diagnosing faults on fiber optic cables with STRATOS and CTOS connectors, and direct HMA technical successor connectors.

The OPTOKON Diagnostic Set includes two instruments - Light source and Power meter. Both instruments are housed in a hard carry case that meets the requirement of fiber optic networks installation and maintenance teams, who require rugged and lightweight fiber optic test equipment that combines high performance with ease of use and reliable operation.

The Diagnostic Set provides traceable measurements on dual wavelength and data storage to any PC. It includes the hybrid master HMA-FC patchcord for testing of military tactical networks and is comprised of these measurement instruments:

- LS-800 light source
- PM-800 power meter
- NSN: 6650-16-006-2316

LS-800 Light source

- Small size, lightweight
- Modulation CW, 270 Hz, 1 kHz, 2 kHz
- AWD function (Auto Wavelength Detection)
- Changeable output connectors
- Battery status indicator
- User manual
- Up to 7 light source combinations
- Built-in Li-Pol rechargeable battery charging via USB port

PM-800 Power meter

- Small size, light weight
- Up to 6 working wavelengths
- Detection of modulation 270 Hz, 1 kHz, 2 kHz
- AWD (Auto Wavelength Detection) function
- Absolute and Relative optical power measurement
- Two level high capacity memory
- SmartProtocol PC software
- Memory download and reporting solution
- USB
- Built-in Li-Pol rechargeable battery, battery charging via USB port
- Auto Off function and battery status indicator
- Easy to use with menu navigation
- Universal 2.5 mm testing adaptor

OMK-SR-OTS.2

Rugged Case

Material:

Case: Copolymer Polypropylene Structural Resin

Latches: ABS

O' Ring: Neoprene sponge

Pins: Stainless Steel

Purge Valve: ABS with Gore-Tex membrane

Foam: Polyester

Standard:

MIL STANDARD MIL-C-4150J

IP67 in accordance with EN60529/91 & IEC60529/68

Air Transportation Association Spec. 300

Applications

- measurement of insertion loss
- measurement of absolute and relative values
- measurement of two wavelengths
- measurement of optical networks during construction and operation

Equipment included in OMK-SR-OTS.2

Hard carry case	IP67
Protocol	CSMA/CD
Measuring instruments:	Light source: LS-800V-P2-FC-LED850-30 Power meter: PM-800V
Reference patch cords:	PC-280M2-J-002 HMA-J-4xPC-LD40M2-J-002 CTOS-4xPC-LD40M2-002 HMA-J/LD4 OM2-J-002
Measuring adapter	A-FC/PC-02-240-12
USB cable	Storing data to PC
Polyethylene bottle with siphon	Includes isopropyl alcohol
Cleaning wipes	Cleaning connectors
External power supply	Charging internal battery
User manuals	Light source, Power meter
Quick start manual	Check of the route, Measuring the output of the LMC converter

OFT-920

Ruggedized Optical Test Set

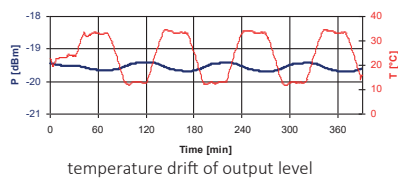

OFT-920

The OFT-920 ruggedized optical test set is designed for testing optical networks terminated with connectors operating in harsh environments. It combines both a light source and optical power meter in one common box. The test set is designed to meet tactical military and broadcast industry demand. The ruggedized aluminium case makes the unit ideal for field operation. The memory capacity allows storage and uploading of up to 2000 measurements including memory position or fiber number, wavelength, absolute value or relative value and insertion loss. The tester supports memory download and test report generating. The rechargeable battery ensures long term working with minimum operation costs.

Key Features

- Expanded Beam and ferrule technology harsh environmental connectors, ruggedized aluminium case
- Multimode (MM) or Single mode (SM) applications
- Simultaneous testing of all 2/4 fibers
- Easy to use with menu navigation
- Built-in Li-Pol rechargeable battery charging via USB port
- Displayed units: dBm, dB
- High dynamic range
- Up to 4 light source combinations
- Internal memory

Czech Army part number:

OFT-920-MM-HMA2-LD850-LED30
FT-920-MM-HMA4-LD850-LED30

NATO stock number:

NSN: 6650-16-006-2311
NSN: 6650-16-006-2316

OFT-855D

SMPTE Hybrid Cable Checker Set

The OFT-855D set consists of SMPTE Tester and SMPTE Remote unit – Loopback. The hybrid cable checker is designed for testing of optical power level in optical fibers and continuity of copper pairs in hybrid cables. It combines optical light source, optical detector and copper wires checker.

It is ideal for testing large spaces of SMPTE Hybrid System for Broadcast Infrastructure Networks. The ruggedized aluminium case makes the unit ideal for field operation. The Lithium rechargeable battery ensures long term working with minimal operation costs.

Key Features

- Hybrid cables – fiber optic and Cu pairs checking
- Ruggedized aluminium case equipped with Display
- Automatic operation check all fibers and wires
- Able to detect incorrect fiber and wire, disconnection and short circuit connection
- Built-in charger, battery status indicator
- Easy to use

Light Source

Output power		Note:
LD 850 nm, LED 850, 1300 nm	-26 dBm (62.5/125 μm fiber)	
LD 1310, 1490, 1550, 1625 nm	-16 dBm	typ. value
Stability (1 hour, delta/2):		tested after 20 min warm up temperature 23 ± 1°
LD 850 nm, LED 850, 1300 nm	± 0.03 dB	
LD 1310, 1490, 1550, 1625 nm	± 0.05 dB	

Power Meter

Photodetector	1 mm InGaAs	
Working wavelengths	MM: 850, 1300 nm	can be customized
	SM: 1310, 1490, 1550, 1625 nm	
Uncertainty	± 12%	1310, 1550 nm @ -20 dBm
Resolution	0.1	
Dynamic range	-55 dBm to +10 dBm	1300, 1310, 1490, 1550, 1625 nm, 850 nm
	-53 dBm to +17 dBm	

General specifications

Dimensions	145 x 145 x 56 mm	without connectors
Weight	400 g	with battery
Temperature	operating	-10 to +50°C
	storage	-40 to +70°C
Humidity (non condensing)	0 to 95%	
IP rating	IP 54	
Battery working time	> 20 hrs	between battery charging

Standard accessories: Power charging adaptor, Soft carrying case, USB Cable, Cleaning swabs

Options: Reference patchcord

Resolution 0.01
Dynamic range -60 dBm to +10 dBm, -53 dBm to +17 dBm

Example of implementation

Combat Communications and Radio System integrated into a wheeled combat vehicle

The driver uses a camera system with night vision and video recording (LMCP).

The commander of the vehicle is working on the Battle Management Vehicular Information System (BMVIS).

The gunman controls the Fire station and the movement of the units on his tablet with the BMVIS application.

The entire crew of the vehicle communicate via intercom (Each member can join the radio network).

Receiving data messages and voice communication is routed via LMCP-28.

Multi-mission communication with wideband networking, SATCOM and legacy narrowband interoperability provides RF-300-V250 designed for long-range applications and increased communications reliability.

Communication with the crew out of the vehicle ensures SPR (RF-7800S-V).

Land Mobile Broadband Global Area Network (BGAN) Terminal provides high-speed tactical network access to mobile units when SATCOM is the only option.

Vehicular Satcom X-wing antenna provides SATCOM-On-The-Move applications.

LMCP-28H-NG

Transport boxes

OPTOKON offers a wide range of carrying cases are designed to be the most rugged, waterproof, shock absorbent equipment cases. The cases are widely used for OPTOKON harsh environmental fiber optical passive components and active devices for storage, transportation and operation in field conditions. The cases have been used by military personnel, as well as many other industry professionals and telecommunications operators.

OPTOKON Testing Division

Mechanical testing, temperature and semi-anechoic chamber

The OPTOKON testing division offer Individual temperature and mechanical test methods according to the standard CSN EN ISO/IEC 17025.

Testing services:

- EMC test (MIL-STD 461G and EN 50147-1)
- Tensile test fiber optic cables
- Cable abrasion test
- Pressure resistance test
- Shock resistance test
- Repeat bending test
- Torsion Test
- Test of cable flexibility
- Bending test in loop
- Dynamic bending test
- Temperature cycling
- Water penetration test

The OPTOKON EMC chamber meets all the MIL-STD 461G requirements for the certified EMC measurement of the tests: CE 101; CE 102; CS 101; CS 114; CS 115; CS 116; RE 102 and RS 103. The design of the chamber meets the field intensity minimum 50 V/m for the susceptibility tests. The shielding effectiveness measured according to the EN 50147-1 is stronger than the EN 50147-1 recommendation.

OPTOKON EMC chamber

The OPTOKON EMC chamber based on the ETS-Lindgren system provides a precision-grade free-field environment ideal for measuring sound source directivity, frequency response, and noise emissions from spherically radiating sound sources.

OPTOKON Accredited Calibration laboratory No. 2315

Accredited calibration services:

- Calibration of optical power meters (wavelengths 635, 650, 850, 880, 910, 940, 1270, 1310, 1330, 1490, 1550, 1625, 1650 nm)
- SM detector (photodiode) spectral responsivity calibration (All CWDM wavelength, 1625 and 1650 nm)
- MM detector (photodiode) spectral responsivity calibration (wavelengths 635, 650, 850, 880, 910 and 940 nm)
- Calibration of OTDRs
- Calibration of optical attenuators
- Calibration of light sources
- Calibration of RL meters
- Calibration of temperature and humidity

Other calibration services:

- Calibration of OSA
- Calibration of spectral parameters of optical sources

OPTOKON

OPTOKON, a.s. is a leading global producer and supplier of premium active and passive fiber optic components and specializes in fully tested integrated data network, FTTx and tactical military solutions. Our components and solutions can be found in applications in businesses, communities and armed forces throughout the world.

OPTOKON is an ISO 9001 approved company, and was founded in 1991 with headquarters located in Jihlava, the Czech Republic. The operational management structure of OPTOKON is based on a matrix organization consisting of six manufacturing divisions utilizing state-of-the art technology and strong technical expertise to create the OPTOKON product portfolio, which is coupled with regionally managed OPTOKON facilities comprised of company branches and distribution outlets, thus ensuring an active global distribution network to meet customer demand.

- Fiber Optic Technology leadership
- 28 years experience on the global fiber optic market
- More than 23 years experience of supplying
- the militaries of over 27 countries
- National Security Authority certified
- ISO and AQAP certified
- Accredited Calibration Laboratory No.: 2315

OPTOKON
NATO supplier code: 1583G
