The Defence and Security Industry Association of the Czech Republic

Czech defence and security industry is well known for its long-term history, unique structure, high-quality products and big innovation potential. Czech producers of military material always had to fight with limited options of the domestic customer given by small size of our country and its armed forces. Therefore, Czech producers of defence and security technologies had to constantly innovate their products that must be competitive mainly on foreign markets where we export 90 % of our production. Competitiveness of Czech products, whole scale of professionals and good name of traditional Czech arms industry create the cornerstone of Czech companies' export potential.

Defence and Security Industry Association of the Czech Republic (AOBP) affiliates companies involved in research, development, manufacture, trade and marketing of defence and security equipment, materials and services. For almost 30 years of its existence gained AOBP reputation of acknowledged representative of the Czech defence and security industry, important partner of Ministry of Defence, Ministry of Interior, Ministry of Foreign Affairs and Ministry of Industry and Trade. AOBP also cooperates with the Parliament of the Czech Republic, in particular with the Foreign, Defence and Security Committees of the Senate and the Defence and Security Committees of the House of Deputies. AOBP represents the Czech Republic in NATO Industry Advisory Group (NIAG) and is present in structures of the Aerospace and Defence Industries Association of Europe (ASD). AOBP is also acting as national central hub for EU defence related programs, such as the European Defence Fund (EDF). AOBP is actively involved in triangular dialogue between the European Commission, Ministry of Defence and national industry. These relations are stepping stones for efforts of the Czech defence and security industry to be involved in specific European, transatlantic and international projects.

It is my pleasure to say that Czech products of defence and security industry belong to the world top products and the main reference is the satisfaction of customers worldwide. I wish everyone who received this catalog that it will benefit them in their work.

3Dees Industries s.r.o.

ADDRESS: Doudlebská 1699/5,
140 00 Praha 4 - Nusle, Czech Republic
PHONE: +420 733 643 826
E-MAIL: 3dees@3dees.cz
WEBSITE: www.3dees.cz

MAIN ACTIVITIES:

- consulting related to the introduction of additive digital manufacturing in companies
- sales and service of complete solutions for additive manufacturing
- HP, Stratsys Voxeljet and Formlabs production 3D printers for plastic parts and hybrid 3D production of metal parts
- Zeiss 3D scanners for industrial applications
- 3D printing and 3D scanning services

ABNER a.s.

ADDRESS: Lanškrounská 87,
571 01 Moravská Třebová, Czech Republic
PHONE: +420 461 313 111
E-MAIL: abner@abner.cz
WEBSITE: www.abner.cz

MAIN ACTIVITIES:

ABNER a.s. was established in 1993 and quickly became synonymous with quality and innovation in the field of gastro equipment. The company's main products include transport tablet carts, active and passive tablet systems for food transport, gastro carts, counters, and shelves for demanding food service operations, including ocean liners.

Tablet Systems. Their essential advantage is the long-term preservation of food freshness. All components and aromas in the food remain separate during transport, ensuring the food is fresh and immediately ready for consumption. In addition to standard tablet systems, we offer a wide range of accessories to enhance your meal delivery system to best suit your needs.

Pressure Cartridges serve as the driving medium in fire extinguishers. Innovation, listening to our customers, and the ability to respond to their needs have made the company the largest manufacturer of fire extinguisher pressure cartridges in Europe.

ADHOG Advertising, s.r.o.

ADDRESS: Na Vrchmezi 222/16,
160 00 Praha 6, Czech Republic
PHONE: +420 775 708 082
E-MAIL: ales.pospisil@adhog.eu
WEBSITE: www.adhog.eu

MAIN ACTIVITIES:

ADHOG Advertising was founded in 2005. It was founded by a group of professionals who came from the Lowe & Partners network.

ADHOG has the know-how of large agencies enriched by the team members who have successfully worked in international corporations, government, and media.

ADHOG knows the specifics of the local market, it also focuses on international markets, which helps to open for Czech exporters. ADHOG is obsessed with the need for detailed knowledge of the target group, because a proper understanding of the target group is the key to setting up the right communication.

Local companies or multinationals develop brands, profile the product, and come up with innovative solutions with ADHOG. Together they implement strategies involving PR, Public Affairs and Government Relations practices.

ADHOG believes that the idea is more important than the amount of money spent. They understand the budgetary constraints of the Czech market and always look for the quality of multinational solutions within the local financial possibilities.

Adventure Menu s.r.o. (divize PRO-RATION)

ADDRESS: Koubkova 399/10, 120 00 Praha 2,
Czech Republic
PHONE: +420 724 944 262
E-MAIL: slaby@adventuremenu.com
WEBSITE: www.pro-ration.com

MAIN ACTIVITIES:

Since 2011, the company has been developing and manufacturing premium ready-to-eat meals for tactical, professional and crisis use. Meals are hand cooked from 100% natural ingredients with no added chemical additives, ensuring the natural taste and sensory experience of homemade food. Food preservation and shelf life of up to 15 years is ensured by two technologies, sterilization (ready-to-eat) and vacuum drying (lightweight meals). For tactical use, the company offers complete 12h and 24h food rations developed in cooperation with combat units. For crisis solutions, IZS and SSHR, the company offers so-called Emergency Packages with ready-to-eat meals, drinking water with a shelf life of up to 50 years and self-heating. All meals are produced in-house in the Czech Republic. The aim of the company is to provide really high quality meals for professionals in any conditions.

AERO Vodochody AEROSPACE a.s.

ADDRESS: U Letiště 374, 250 70 Odolena Voda,
Czech Republic
PHONE: +420 255 762 542
E-MAIL: info@aero.cz
WEBSITE: www.aero.cz

MAIN ACTIVITIES:

AERO Vodochody AEROSPACE a.s. focuses on the development, production, maintenance, and modernization of military and civil aircraft and is the largest aircraft manufacturer in the Czech Republic and one of the oldest aircraft manufacturers in the world. In the field of its own aircraft, Aero is a permanent partner of a number of military air forces and has a strong position in the market for military trainers and light combat aircraft. With 11,000 aircraft produced in its 100 years of existence, hundreds of L-39 Albatros aircraft still in service with dozens of military operators and a number of demo teams, and especially with its new L-39NG aircraft, Aero has established itself as a leader in the global jet trainer market. In the civil aviation sector, Aero works with major aircraft manufacturers on a wide range of projects and is a partner in several risk-sharing programs, where it is responsible not only for the manufacture and assembly of aircraft assemblies, but also for their development.

AGADOS, spol. s r.o.

ADDRESS: Průmyslová 2081,
594 01 Velké Meziříčí, Czech Republic
PHONE: +420 566 653 311
E-MAIL: obchod@agados.cz
WEBSITE: www.agados.cz

MAIN ACTIVITIES:

AGADOS is a traditional Czech brand that has been producing trailers since 1992. It is one of the largest domestic and European trailer manufacturers in the categories up to 750 kg and up to 3,500 kg. It offers a wide range of braked and unbraked trailers in various sizes and variants, including hobby trailers, motorcycle and car carriers, box trailers and professional trailers up to 10 metres in length.

Since 2014, the company has also been focusing on the production of special trailers, which are an important part of the Czech Army's equipment, as well as being used by several NATO member countries. These include mobile field kitchens, an amphibious off-road trailer, a water treatment plant, a drinking water tanker or a refrigeration and freezing trailer.

In line with its commitment to quality and reliability, AGADOS is a proud holder of ISO 9001 and ČOS 051672 (AQAP 2110) certificates.

AgentFly Technologies s.r.o.

ADDRESS: Karlovo náměstí 290/16,
120 00 Praha 2, Czech Republic
PHONE: +420 605 766 814
E-MAIL: info@agentfly.com
WEBSITE: www.agentfly.com

MAIN ACTIVITIES:

AgentFly Technologies is a research and technology company using artificial intelligence, robotics, and simulations applied to the security of critical infrastructure, industrial inspections, tactical drone control, and air traffic management domains.

AgentFly Technologies has broad expertise and experience in advanced control of autonomous drones, trajectory planning in complex environments, conflict detection and resolution, integration of drones into shared airspace, and simulation of air traffic management, including human cognitive behavior modeling.

Activities include applied research, software and hardware development, deployment of complete solutions, integration into customer systems, professional drone operation, and consultancy. Key products are automated drone solution for unattended perimeter protection, drone for ammunition drop, automated infrastructure inspections, anti-drone protection evaluation system, tactical drone simulations, air traffic management simulations.

AKM GROUP - CZ, a.s.

ADDRESS: Rubeška 215/1,
190 00 Praha 9 - Vysočany, Czech Republic
PHONE: +420 226 201 111
E-MAIL: info@akmg.cz
WEBSITE: www.akmg.cz

MAIN ACTIVITIES:

AKM GROUP-CZ has been founded in Prague in 2001. Initially, the company specialized in the trade of dual-use goods and aviation spare parts. Later, the company included small arms and ammunition, artillery ammunition, mortar rounds, grenades, grenade launchers, mortars, rockets, anti-tank weapons, armored vehicles, air defence systems, drones and anti-drone weapons in its product range. The company has exclusive contracts for the sale of military and dual-use goods from the world's famous manufacturers. The company actively develops its own logistics infrastructure and works on launching joint production of dual-use goods, weapons and ammunition. Soon we will be able to provide storage and transshipment services for weapons, ammunition and dual-use goods (including goods under customs control). AKM GROUP-CZ invests in young companies that are working on new types of weapons. The company already has experience in investing in the production of large-caliber machine guns, automatic grenade launchers, drones and a production line for filling mortar rounds with TNT.

ALEXANDER ELECTRIC s.r.o.

ADDRESS: Štěrboholská 1307/44,
102 00 Praha 10 - Hostivař, Czech Republic
PHONE: +420 281 001 341
E-MAIL: aeps@aeps-group.cz / chudomel@teslaelectric.eu
WEBSITE: www.aeps-group.com

MAIN ACTIVITIES:

Alexander Electric is a designer and manufacturer of reliable isolated AC/DC and DC/DC power supply units and blocks made for harsh environment applications. Our product range offers both standard and customized products, which are made in compact dimensions and ultra-low profiles, with output power up to 10 kW, with focus on one-sided conductive cooling.

The products are meant to operate in environment with vibrations, high temperatures (-60 °C to +130 °C), dust or humidity, decreased ambient pressure and other harsh conditions while providing very high reliability, a set of protection systems and a range of service functions (parallel operation, external feedback, remote turn-on and other).

Our units are optimal for application in supercomputers, thin-walled outdoor displays, lasers, UAS /UAV, telecommunications systems, radars or other military systems.

AOBP members

ALFAVARIA Group s.r.o.

ADDRESS: Londýnská 78, 460 01 Liberec,
Czech Republic
PHONE: +420 485 100 303
E-MAIL: army@alfavaria.cz
WEBSITE: www.alfavaria.cz

MAIN ACTIVITIES:

- Mobile repair shops for maintenance and repairs of military technics a full-fledged solution for the repair and maintenance of army equipment in the field. As desired, we are able to build the workshop into the superstructure of a truck, container or armored personnel carrier. According to the specification we will change the designated space into a mobile workshop, lathe workshop or rescue vehicle workshop
- Vehicle built-ins, customized vehicles for servicemen, dog handlers, laboratories, veterinarians, etc. We design, manufacture and install vehicle built-ins into all types and sizes of vehicles
- Truck bed storage drawers and slide systems - easy access to the pickup truck bed, clear and safe storage of equipment.
- Custom storage systems for the military - design and production of storage systems for the transport of selected material.
- Durable outdoor cases
- Tools and special preparations for the repair and maintenance of army equipment

ALLSAT s.r.o.

ADDRESS: Českobrodská 516,
198 00 Praha 9 – Hostavice, Czech Republic
PHONE: +420 271 745 266
E-MAIL: info@allsat.cz
WEBSITE: www.allsat.cz

MAIN ACTIVITIES:

Import, sale, development, training and service of special surveillance products for government organizations.

Amicus Verus s.r.o.

ADDRESS: Zborovská 620/47,
150 00 Praha 5 - Malá Strana, Czech Republic
PHONE: +420 724 213 977
E-MAIL: jan.tesar@amicusverus.com
WEBSITE: www.amicusverus.com

MAIN ACTIVITIES:

Amicus Verus is a specialised advisory company, providing strategic advisory services with the primary aim to serve clients from the defence & security industry, as well as other strategic sectors. We help our clients with the identification and execution of business opportunities, where the typical partner is a state authority or an international organisation. With respect to long-standing experience of our team, as well as a broad network of local consultants, we are already offering coverage of five continents, where we continue to grow and strive to continuously improve the quality of our services. Amicus Verus is assisting its partners to enter new markets, broaden their existing footprints, develop key relationships and forge strategic partnerships. We treat each project individually, with a tailored solution aimed at successfully delivering in the commercial, industrial and political sense.

Aon Central and Eastern Europe a.s.

ADDRESS: Václavské náměstí 832/19,
110 00 Praha 1, Czech Republic
PHONE: +420 737 860 559
E-MAIL: lenka.hollmannova@aon.cz
WEBSITE: www.aon.com

MAIN ACTIVITIES:

Aon PLC (NYSE:AON) is a leading global professional services firm providing a broad range of risk solutions. With the help of more than 50,000 colleagues in 120 countries and using unique market data and rigorous analysis, we provide clients with solutions that reduce volatility and improve performance. Aon has been operating in the Czech Republic since 1993 with more than 250 employees. With experience, global reach and state-of-the-art analytics, we are better able to provide information and advice that helps companies protect and grow their businesses. Our goal is to enable all clients to make better decisions.

• Risk Consulting • Commercial Risk and Reinsurance Solutions • Health Solutions • Data & Analytic Services • Assistance in settling insurance claims

asphericon s.r.o.

ADDRESS: Milířská 449, 463 12 Jeřmanice,
Czech Republic
PHONE: +420 483 100 300
E-MAIL: sales@asphericon.cz, info@asphericon.cz
WEBSITE: www.asphericon.com

MAIN ACTIVITIES:

asphericon is specialist and technology leader in field of aspheric components and optical systems. With the emphasis to using latest manufacturing technologies, continual innovation process, skilled workers and world class measuring equipment is asphericon able to provide high quality optical solution for more than 800 customers worldwide.

asphericon is the pioneer for the first completely digitized production process in photonics. Based on a worldwide unique, self-developed and patented control software for CNC manufacturing, asphericon combines all manufacturing parameters in a central database system. The result is an optimized and flexible manufacturing process for prototypes, single pieces and large series. asphericon accompanies its customers from optical design, production and coating, full-surface interferometric measurement and documentation up to the assembly of optical components as well as their optical characterization.

ATHEX Technology s.r.o.

ADDRESS: Bartošova 5532, 760 01 Zlín
Kvítková 2898/60, 760 01 Zlín, Czech Republic
PHONE: +420 777 799 535
E-MAIL: info@athex.cz
WEBSITE: www.athex.cz

MAIN ACTIVITIES:

ATHEX Technology – Innovative Explosion-Proof Modular Housing System

- Affordable, unmatched protective enclosures for Ex environments.
- APatented modular tight-closure storage system with variable configurations.
- ASafety protection for electrical equipment, lighting, or cargo.
- AUltralight aluminum shell – up to 75% lighter than the competition.
- Aldeal for hazardous Ex conditions: high temperatures, explosion risk, dust, pressure, impacts, and more.olution
- ASolution across Industry: automotive, military, firefighting, heavy industry, petrochemicals...
- ACertifications: Meets the highest standards for IP, IK, temperature resistance, chemical exposure, and Ex (explosion-proof) protection.

ATS-TELCOM PRAHA a.s.

ADDRESS: Nad elektrárnou 1526/45,
106 00 Praha 10, Czech Republic
PHONE: +420 283 003 111
E-MAIL: info@atstelcom.cz
WEBSITE: www.atstelcom.cz

MAIN ACTIVITIES:

- Comprehensive services of extensive data and communication networks, including networks of the critical infrastructure - consultancy, audit, design, installation and provision of operation and guaranteed services according to SLA.
- Ensuring information security according to current recommendations, standards and laws, including certified means of cryptographic protection of information.
- Security consulting, services in the field of ISMS, information security according to the national regulation, GDPR and Whistleblowing, including the offer and delivery of software tools.
- Development, production and service of ruggedized mobile workplaces for securing the transport and operation of electronic devices in field conditions.
- Supplies of hand-held laser vehicle speed meters, service and metrology.

AUDIOPRO s.r.o.

ADDRESS: Mladoboleslavská 1108,
197 00 Praha 9 – Kbely, Czech Republic
PHONE: +420 257 011 177
E-MAIL: info@audiopro.cz
WEBSITE: www.audiopro.cz

MAIN ACTIVITIES:

Audiopro s.r.o. founded in 2002, is a distributor of more than 60 foreign companies with professional AV equipment, including cloud services and products from the field of special equipment, which are intended for professionals from Defence industry and Rescue services.

The portfolio offers products and technologies for Risk Management; Global surveillance system for large areas monitoring; Autonomous system for covert monitoring; Compact unmanned system – sUAV VTOL operation in MESH network; Communication, tactical headsets with active hearing protection; personal cameras for operations in difficult conditions; Independent connection/connectivity – stable, unbreakable connection to high-speed internet, Independent energy sources – methanol/ hydrogen fuel cells; Special transport boxes – safety multifunctional boxes and 19" racks

Audiopro designs its own system solutions according to user needs, creating a natural, intuitive environment for fieldwork and effective teamwork.

AURA, s.r.o.

ADDRESS: Úvoz 499/56, 602 00 Brno,
Czech Republic
PHONE: +420 544 508 111
E-MAIL: aura@aura.cz
WEBSITE: www.aura.cz, aura.publi.cz

MAIN ACTIVITIES:

AURA is the largest Czech exporter of information systems for defence and security forces, specialising in military logistics, crisis logistics support, material lifecycle management, materiel codification according to NATO Codification System (NCS), and defence standardisation and controlled distribution of sensitive documents.

Products & services:

- Logistic Information System (LIS) covering all major areas of military logistics
- MC CATALOGUE, IS for materiel codification according to NCS and comprehensive services in this area
- AURA is a certified Codification Agency
- Support of international codification courses NCS College (www.ncscollege.cz)
- IS STAN, document/content management system for defence standardisation
- Publi, platform for the generation, controlled distribution and sharing of documents, including sensitive content, with encrypted storage and online/offline access
- Knowledge Management Systems for CBRN Incident Protection – AURA is the representative of the Danish company Bruhn NewTech

bee inspired & funded

MAIN ACTIVITIES:

We are a Czech consultancy company specializing in securing project financing for our clients in both the private and public sectors. Our services include obtaining funds from European programmes managed in the Czech Republic and Brussels (such as Horizon Europe, the Innovation Fund, and the European Defence Fund), as well as other subsidies and private sources.

We are committed to contributing to the modernization and development of the Czech and European defence and security industry through our expertise in securing resources for development and innovation.

We build partnerships and relationships at national and European level, working for the European Commission, Czech ministries, regions, cities and municipalities.

We are more than dedicated project managers – we bring a strategic perspective, design programmes, plans and projects, and find synergies and integrated solutions.

FUTURE
TECHNOLOGY
DELIVERED

MAIN ACTIVITIES:

DEL Group is a leader in automation, robotics and engineering in the Central European markets. Our competitive advantage is complete integration. We handle projects from initial idea to final assembly. From the initial concept to the complex data collection from the running line. All according to Industry 4.0 standards and under one roof.

Our customers are major companies from the automotive, heavy and light industry, energy and engineering sectors.

We also offer production of switchboards and electrical cabinets. We produce our own range of charging stations for electric vehicles. Since 2008, we have also focused on the design and installation of photovoltaic power plants. From small installations on family houses to large industrial solutions with a capacity of hundreds of megawatts.

We are not indifferent to the world around us. We are dedicated to the development and application of technology with a focus on a shared responsible future.

DoxoLogic, s.r.o.

SECURITY
MAGAZIN

MAIN ACTIVITIES:

SECURITY MAGAZIN is a part of the media group Expert Publishing Group. Our publishing house offers a wide range of marketing services from articles to videos, advertising, website creation and more marketing opportunities. We are the largest news website in the field of defence and security in the Czech Republic. The publication has been on the market since 1994, and since 2015, it has focused not only on commercial security but also on defence issues. Its monthly readership now exceeds 1.3 million visitors. The publisher of SECURITY MAGAZIN is a member of the Defence and Security Industry Association. The editorial team is also a partner of key events and trade fairs such as IDET and NATO Days in the Czech Republic, and MSPO in Kielce and Eurosatory in Paris abroad. The magazine explores various processes affecting not only Czech armed forces and security units but also focuses on their broader political and diplomatic contexts and military history.

MAIN ACTIVITIES:

Organisation of professional events and activities within the FUTURE FORCES FORUM (FFF) – International platform for trends & technologies in defence & security. Prague has been a long-time hub for international defence and security community networking within the FFF events, regularly hosting national delegations from over 60 countries.

The program addresses the latest trends and needs in the defence and security area. Furthermore, it is important platform supporting cooperation of partner countries, international organizations, military, law enforcement and other security forces, private sector, R&D, and academia across the globe.

The FFF provides excellent opportunity to gain, as well as to share information about new trends and approaches, identified capability gaps, to network with counterparts and to review the latest products and services.

16th biennial defence & security forum, exhibition and networking within the FUTURE FORCES FORUM will take place in Prague on 21–23 October 2026.

Nefab Packaging Czech Republic s.r.o.

*ADDRESS: Tuřanka 1314/110, 627 00 Brno,
Czech Republic
PHONE: +420 727 985 954
E-MAIL: jakub.brazdil@nefab.com
WEBSITE: www.nefab.com*

MAIN ACTIVITIES:

Nefab is a leader in the supply of multi-material packaging with many years of experience in the development, innovation and supply of complex packaging. Customers are our partners and therefore we place emphasis on clearly understanding their needs and ideas about the resulting packaging solution. The designs cleverly use the advantages of different materials and their combinations so that the resulting packaging is simpler, stronger, but at the same time saves the overall costs of packaging, logistics and CO2. Thanks to our own engineers and the possibility of testing, customers can be sure that the solutions we deliver will always meet their needs and expectations. Most production in the defence industry cannot simply be packed in a cardboard box. The bulk of production has customized packaging to protect the product, allow for easy handling, and often require certification. Manufacturers such as SAAB, THALES, ZEVETA, ERA, COLT also use NEFAB solutions for the above reasons.

Czech Republic
PHONE: +420 233 371 850
E-MAIL: info@polymernanocentrum.cz
WEBSITE: www.polymernanocentrum.cz

MAIN ACTIVITIES:

POLYMER NANO CENTRUM has been developing polymer nanostructured technology since 2015. We produce nanostructured plastics that are suitable for artillery shell and cartridge production, with 25-30 % improved efficiency in:

- Mechanical, Electromagnetic, Electrostatic properties
- Higher chemical resistance
- Max. pressure of dust gases >500 MPa
- Max. temperature of dust gases >4000 °C

A novel polymer meets all tactical and technical requirements, including resistance to external influences and weapons safety standards for various calibers.

Our experts provide full assistance throughout all production stages:

- Development of tailor-made solution
- Production plan according to technical requirements
- Delivery of necessary equipment
- Supply of nanostructured plastics
- Production start and quality control

FUTURE FORCES EXHIBITION & FORUM | 16 – 18 OCTOBER 2024 | PRAGUE

International Exhibition, Expert Panels & Networking

Prague has been a long-time hub for defence & security community networking within the FFF events organised under the auspices of the Czech Government and in cooperation with armed and security forces, NATO, EDA and other relevant organisations.

The primary objective is to enhance security and defence cooperation within the NATO, EU and other partner countries, military and civil authorities. The program addresses the latest trends and needs, and helps to achieve the much sought-after interoperability in worldwide joint all-domain operations. The FFF also regularly hosts NATO working groups sessions.

It is an excellent opportunity to exchange views on the identified areas of priority, while providing in parallel the opportunity to discuss and present a range of important issues of mutual interest with all stakeholders and partners involved in defence & security field.

MAIN ACTIVITIES:

RENOMIA is an international company, founded in 1993 in the Czech Republic, which provides comprehensive services to corporate and individual clients in the field of insurance, risk management and financial services. RENOMIA employs specialists focusing on individual fields of business and thanks to this, the company offers its clients the most advantageous insurance conditions and support in claims settlement. More than 2,000 professionals in 11 countries in Central and Eastern Europe manage premiums of almost CZK 15,2 billion for RENOMIA's clients. Arthur J. Gallagher, the world's leading insurance broker based in Chicago, USA, is a strategic partner and minority shareholder of RENOMIA. Thanks to this partnership, RENOMIA is able to provide its clients with professional services anywhere in the world. In December 2020, RENOMIA was named Insurance Broker of the Year 2019-2020 in Czech Republic. It is also the only insurance broker to be listed as one of the best Czech companies according to the Czech 100 Best.

Rescue Trailer s.r.o.

ADDRESS: Zlatá Olešnice 184,
468 47 Zlatá Olešnice, Czech Republic

PHONE: +420 733 712 399

E-MAIL: jakub.tomes@rescuetrailer.cz

WEBSITE: www.rescuetrailer.cz

RESCUE TRAILER

MAIN ACTIVITIES:

The Rescue trailer is a folding trailer for transporting people and material, which in its dimensions complies with the NATO pallet 463L standard. Thanks to its folding concept it saves transport and storage costs. It is suitable for all scenarios of use in natural disasters and war conflicts, not only as an escort vehicle but also as a mobile base. It is equipped with a traction battery, water tank, electric generator and other devices and equipment that is individual to the customer's needs. The design of the trailer allows the installation of ballistic protection according to the requirements. The Rescue Trailer is homologated up to 3.5t, but its maximum possible load is 9t. Its towing is possible behind cars and trucks thanks to the adjustable drawbar.

SCANIA

MAIN ACTIVITIES:

Scania has been supplying its vehicles to armies and IRS around the world for more than a hundred years. Czech army, firefighters and others are also using them. Thanks to the modular production system, Scania offers a wide range of chassis configurations, including 8x8, wide selection of cabs, incl. armored, as well as a wide variety of reliable powertrains with latest emission standards. In addition to classic diesel, these engines can run on NATO and HVO fuel. The most popular are economical and powerful six-cylinder engines as well as V8 engines that meet all the requirements for transporting heavy loads (e.g. military equipment). With regard to reliability and high performance, Scania engines are also used for armored vehicles from a number of manufacturers. These engines are linked to Scania vehicles by a significant advantage: the support of a wide service network (over 1,800 locations worldwide), which also means easy availability of spare parts. Scania also offers container workshops and mechanic trips to the place of need.

- development , production and marketing of devices for both civil and military sections of the Rescue System in the Czech Republic and abroad;
- development , production and marketing of high frequency welded products;
- development , production and marketing of sewing products.

VAKUFORM® products has been using by eight NATO armies since 1997 and the total number of products with NSN is currently 41.

Veletrhy Brno, a.s. (BVV Trade Fairs Brno) – IDET

ADDRESS: BVV Trade Fairs Brno,
Výstaviště 405/1, 603 00 Brno, Czech Republic
PHONE: +420 541 152 944
E-MAIL: idet@bv.cz
WEBSITE: www.idet.cz, www.idet.eu

MAIN ACTIVITIES:

The IDET International Defence and Security Technologies Fairs is a major defence and security technology show in Central Europe with strong international participation of exhibitors and trade visitors. It takes place with the support and participation of the most important political and military leaders. The exhibition is visited by international military delegations from many countries of the world. Concurrently with IDET, the PYROS (International Fire Fighting Equipment and Services Fair) and ISET (International Security Technology and Services Fairs) are also held, presenting all components of the integrated rescue system. The IDET trade fair also features a supporting programme consisting of trade conferences and seminars. IDET ARENA, an off-road polygon for dynamic demonstrations of military, firefighting and police equipment in action, will be in operation in the outdoor area. The GOLDEN IDET awards for the best exhibits are also presented at the fair.

VIAVIS a.s.

ADDRESS: Obránců míru 237/35,
703 00 Ostrava-Vítkovice, Czech Republic

We have been operating on the market since 2000 and our services are used by hundreds of clients, whether they are private companies, public administration entities in the Czech Republic, but also clients from Slovakia, Austria and Poland

We provide consultative, methodical and advisory services in the areas of:

- Information and cyber security
- Technical measures of the network and server infrastructure of ICT systems
- Organizational measures of information and cyber security
- Solving cyber attacks and security incidents
- Physical and personal safety
- Protection of personal data
- Protection of non-public information and trade secrets
- Penetration tests
- Education
- and others.

VISITECH a.s.

ADDRESS: Košínova 655/59,
612 00 Brno - Královo Pole, Czech Republic
PHONE: +420 538 700 880, +420 731 113 239
E-MAIL: info@visitech.cz, tereza.manczalova@visitech.cz
WEBSITE: www.visitech.cz

MAIN ACTIVITIES:

VISITECH a.s. is a stable partner in the area of cyber security. Apart from doing sales activities and consultancy aimed at complex innovative ICT solutions, we built a cyber security center – Security Operation Center SOC365, which maintains and monitors ICT networks as a service following new western market trends. It is a well-established multiplatform system integrator and a specialized supplier of hardware, software, data networks components, unified communication, back-up and storing solutions and security technologies. Next to their own SOC365 security center VISITECH offers products and technologies chosen independently of a vendor and a brand, while the emphasis is placed on long-term experience and a great added value for the customer. Visitech is also an established supplier of Asset Management solutions, for asset management with particular emphasis on the areas of planning and maintenance, and is also a multi-platform systems integrator, specialising in data networking components.

Vojenský technický ústav, s.p.

ADDRESS: Mladoboleslavská 944,
197 00 Praha 9 - Kbely, Czech Republic
PHONE: +420 910 105 111

WEBSITE: www.vtusp.cz

MAIN ACTIVITIES:

The Military Technical Institute occupies an important position within the defence sector of the Czech Republic. It has a quality technological base in the field of defence and security research and development, including weapons, ammunition, ground equipment, unmanned reconnaissance equipment, aircraft on-board equipment, radio and airport technical equipment, simulators and communication systems.

The company's primary capabilities include the implementation of research and development, prototype production, testing and certification, repairs, service and modernization of armaments and technology, foreign military sales, system integration, project management including processing studies and analyzes for the Czech Army and other armed security forces and the integrated rescue system.

VOP CZ, s.p.

ADDRESS: Dukelská 102,
742 42 Šenov u Nového Jičína, Czech Republic
PHONE: +420 556 783 111
E-MAIL: vop@vop.cz
WEBSITE: www.vop.cz

MAIN ACTIVITIES:

VOP CZ, s.p. is owned by the Ministry of Defence of the Czech Republic and profiles itself in the field of military technology, engineering production, research and development.

It provides complex repairs of heavy military ground vehicles and life cycle. It is one of the most important manufacturers and providers of repair, modernisation and service in the field of defence and security in the Czech Republic. It has its own development centre with competitive projects applied in the Czech Army, security forces and civilian sector. It is a pioneer in research and development of military autonomous UGVs in the Czech Republic.

It systematically creates conditions to strengthen its position as an integrator and supplier of modern military equipment and systems primarily for the Czech Army and other state security forces.

VOP CZ, s.p. has 78 years of experience, know-how and tradition in the field of production, modernisation and repair of military and special equipment.

VOP Dolní Bousov, spol. s r.o.

ADDRESS: Tovární 785, 294 04 Dolní Bousov,
Czech Republic
PHONE: +420 326 396 250
E-MAIL: vop@vop-db.cz
WEBSITE: www.vop-db.cz

MAIN ACTIVITIES:

In the area of security the main focus of the production programme is on flood protection. The company VOP Dolní Bousov offers a comprehensive solution in flood protection, be it in the area of planning (flood plans, digital flood plans, monitoring and warning, and notifying the population) or in its specific means of flood protection by using composite mobile flood protection barriers. The company offers original solutions for the protection of the population and their settlements, as well as solutions for the protection of entire territorial units and industrial compounds. The company produces also special security multipurpose barriers (defending barbs) for the security of buildings (military and civilian) within rendition of services.

WEBSITE: www.vvubrno.cz

Vojenský výzkumný ústav, s. p.

MAIN ACTIVITIES:

The Military Research Institute (MRI) is a State enterprise established by the Ministry of Defence of the Czech Republic.

The main mission of the Institute is research, development, expert support, special services and realisation of products, including strategic deliveries for military and security applications. The technical competences of the Institute are focused on military and security aspects of protection in three basic areas: Chemical, biological and radiation protection, Special electronics and camouflage and Materials engineering.

In addition, VVÚ operates a testing center, which is accredited laboratory No. 1449 (accredited by CAI), <https://www.cai.cz/?subjekt=1449-vojensky-vyzkumny-ustav-s-p>. Some activity scopes of MRI are unique within the Czech Republic, namely the fields of military chemistry, camouflage and sophisticated ballistic and mine protection technologies.

MRI cooperates with many countries – especially with NATO and EU partners, further with countries of the Mediterranean area.

Výzkumný ústav stavebních hmot, a.s. (Research Institute for building materials)

ADDRESS: Hněvkovského 30/65, 617 00 Brno,
Czech Republic

PHONE: +420 513 036 090

E-MAIL: info@vush.cz

WEBSITE: www.vush.cz

MAIN ACTIVITIES:

General company specialization:

Applied and basic research in the field of Composite materials and Binder systems.

Main activities relevant to the security and defence sector:

- Increasing the parameters of organic and inorganic composites - enhanced blast and ballistic resistance, thermal resistance, high-performance, electromagnetic shielding, etc.
- R&D of FRP composites for ballistic protection
- R&D of blast wave energy absorbers, including syntactic foams
- Critical infrastructure protection - strengthening of buildings and CI against blast and ballistic loads

Specialized laboratories:

- Laboratory of dynamic phenomena - high strain rate testing-SHPB method, Charpy testing (700 J), drop weight testing
- Laboratory of analytical chemistry, physical chemistry, biology and radionuclides

VZDUCHOTECHNIK, s.r.o.

ADDRESS: Tovární 548, 463 31 Chrástava,
Czech Republic

PHONE: +420 703 182 860

E-MAIL: firbach@vzduchotechnik.cz

WEBSITE: www.firbach.cz

MAIN ACTIVITIES:

Czech company Vzduchotechnik s.r.o. is a traditional engineering manufacturer specializing in the production of air-handling systems and CBRN filters. Since the 1950's to the present it has been manufacturing and supplying air-filter-ventilation systems for underground shelters and bunkers. The company has its own research and development and benefits from its know-how regarding elements and systems for air extraction and filtration used for civilian applications. Our security solutions can be found both in shelters for civil defence and bunkers and shelters used by military forces, as well as in defence systems designed for private clients. Based on the demand, we are able to realize and completely equip an underground bunker or shelter anywhere in the world in cooperation with our partners. We are holders of quality management system ISO 9001:2016 and ISO 3834-2:2006, at the same time our products contain components that comply with NATO standards.

ZÁHOŘÍ TRADE s.r.o.

ADDRESS: Přerovská 38,
768 61 Bystřice pod Hostýnem, Czech Republic

PHONE: +420 603 142 847, +420 603 811 109

E-MAIL: jakub.rudel@zahoritrade.cz, info@zahoritrade.cz

WEBSITE: www.nightpearl.com

MAIN ACTIVITIES:

Production, assembly and sale of sports, hunting and military optics (hand-held). Mechanical production, cooperation on the development of software for optoelectronic devices for hunting and military optics.

Services:

Mechanical production (milling, turning, 3D printing), assembly, calibration and service of optoelectronic devices for sports, hunting and military optics.

Main areas of research and development:

Thermal imaging devices, cores of thermal imaging devices, image fusion systems (night, thermal), use of thermal imaging in various areas of sports, hunting and military optics.

ZENIT, spol. s r.o.

ADDRESS: Radlická 138, 150 21 Praha 5,
Czech Republic
PHONE: +420 234 707 079
E-MAIL: let@zenit.cz
WEBSITE: www.zenit.cz

MAIN ACTIVITIES:

- Focus on aviation
- Specialization on W-3A Sokol helicopters
- Support of W-3A Sokol helicopters operation

Zetor Engineering s.r.o.

ADDRESS: Trnkova 3060/111,
628 00 Brno - Líšeň, Czech Republic
E-MAIL: fsoka@zetorengineering.com
WEBSITE: www.zetorengineering.cz/cs/uvod

MAIN ACTIVITIES:

Zetor Engineering, s.r.o. is on the market since 2014 and launches special projects in the area of arms industry. Company is focused on motorized undercarriages - mobile bases and mobile media of special military superstructure specified according to concrete military deployment.

In the area of arms industry, company focuses on development of special mobile undercarriages - mobile military base station capable of meeting new requirements in class IFV (Infantry Fighting Vehicle) based on experience, analyses of currently deployed fighting vehicles of this type in combat missions and on future conflicts prognosis. Current situation proves that security of vehicles in present conflicts is insufficient and that even significant modernization of presently used technique does not guarantee security of the crew. Fighting vehicles of the company will have potential of additional development according to armed forces criteria in at least following 30 years.

ZEVETA Bojkovice, a.s.

ADDRESS: Tovární 532, 687 71 Bojkovice,
Czech Republic
PHONE: +420 572 612 160
E-MAIL: zeveta@zeveta.cz
WEBSITE: www.zeveta.cz

MAIN ACTIVITIES:

ZEVETA was founded as an ammunition factory in 1936 and since the very beginning its production program has been focused on ammunition products for armed forces.

ZEVETA has its own design capacity for the development of various kinds of pyrotechnics and ammunition products. The production program:

- manufacture of all kinds of pyrotechnics and ammunition products
- extensive testing of pyrotechnics and ammunition according to valid EU legislation
- ecological disposal and demilitarization of ammunition

Products:

- smoke screen grenades for tanks
- dummy targets for the protection of aviation technology - flares
- universal hand grenades
- antitank recoilless weapons - RPG
- flash and sound grenades
- color smoke grenades
- signaling ammunition caliber 26,5 mm
- light markers, land lights and signaling pots

ŽĎAS, a.s.

*ADDRESS: Strojírenská 675/6,
591 01 Žďár nad Sázavou, Czech Republic
PHONE: +420 566 641 111
E-MAIL: zdas@zdas.cz
WEBSITE: www.zdas.com*

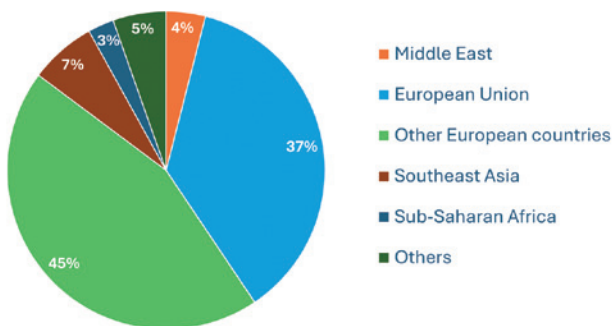

MAIN ACTIVITIES:

The joint-stock company ŽĎAS has been among the top in the engineering and metallurgical industry for more than 70 years. We supply the equipment adapted to the specific customer's requirements. The production halls are equipped with high-quality machines for heavy and light machining, assembly and testing of individual products. Modern base of the design and development together with international certifications are guarantee of the quality and reliability. We also have metallurgical production. We produce open-die forgings, castings and ingots.

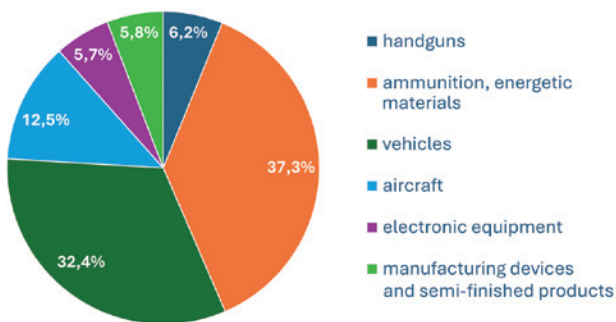

- We provide turn-key deliveries of the lines for production of artillery ammunition of calibers 82 – 155 mm.
- We supply complete integrated forging units to forge artillery barrels.
- We have at disposal extensive production possibilities as the sub-contractor of the manufacture according to the customer's documentation in the extent of material delivery, heat treatment, incl. final machining, and/or complete assembly.
